The Big Of Standards:

Size Standards United States. Congress. House. Committee on Small Business. Subcommittee on SBA and SBIC Authority, Minority Enterprise, and General Small Business Problems, 1984 The Big Four Ian D. Gow, Stuart Kells, 2018-08-28 Messrs Gow and Kells have made an invaluable contribution writing in an amused tone that nevertheless acknowledges the firms immense power and the seriousness of their neglect of traditional responsibilities The Big Four will appeal to all those interested in the future of the profession and of capitalism itself Jane Gleeson White Wall Street Journal With staffs that are collectively larger than the Russian army and combined revenues of over 130 billion a year the Big Four accounting firms Deloitte PricewaterhouseCoopers Ernst Young and KPMG are a keystone of global commerce But leading scholar Ian Gow and award winning author Stuart Kells warn that a house of cards may be about to fall Stretching back to the Medicis in Renaissance Florence this book is a fascinating story of wealth power and luck The founders of the Big Four lived surprisingly colorful lives Samuel Price for example married his own niece Between the world wars Nicholas Waterhouse collected postage stamps while also hosting decadent parties in his fashionable London home All four firms have endured major calamities in recent decades There have been hundreds of court cases and legal prosecutions for failed audits tax scandals and breaches of independence The firms have come so close to extinction level events that regulators have required them to prepare living wills And today the Big Four face an uncertain future thanks to their push into China their vulnerability to digital disruption and competition and the hazards of providing traditional services in a new era of transparency This account of the past present and likely future of the Big Four is essential reading for anyone perplexed or fascinated by professional services working or considering working in the industry or simply curious about the fate of the global economy **Achieving Global Convergence of Financial Reporting Standards** Christopher Patel, Parmod Chand, 2011-12-15 This research monograph examines whether International Financial Reporting Standards IFRS are interpreted and applied in a consistent manner within and across countries and questions the implicit assumption that accounting convergence will automatically lead to comparability in financial reporting Political Standards Karthik Ramanna, 2015-11-09 Prudent verifiable and timely corporate accounting is a bedrock of our modern capitalist system In recent years however the rules that govern corporate accounting have been subtly changed in ways that compromise these core principles to the detriment of the economy at large These changes have been driven by the private agendas of certain corporate special interests aided selectively and sometimes unwittingly by arguments from business academia With Political Standards Karthik Ramanna develops the notion of thin political markets to describe a key problem facing technical rule making in corporate accounting and beyond When standard setting boards attempt to regulate the accounting practices of corporations they must draw on a small pool of qualified experts but those experts almost always have strong commercial interests in the outcome Meanwhile standard setting rarely enjoys much attention from the general public This absence of

accountability Ramanna argues allows corporate managers to game the system In the profit maximization framework of modern capitalism the only practicable solution is to reframe managerial norms when participating in thin political markets Political Standards will be an essential resource for understanding how the rules of the game are set whom they inevitably favor and how the process can be changed for a better capitalism
