ago a global ecological crisis drove humanity to the edge of extinction It forced the survivors to create new strategies for survival and religious rituals were foremost among them Fundamentally Rossano writes religion is a way for humans to relate to each other and the world around them and in the grim struggles of prehistory it offered significant survival and reproductive advantages It emerged as our ancestors first health care system and a critical part of that health care system was social support Religious groups tended to be far more cohesive which gave them a competitive advantage over non religious groups and enabled them to conquer the globe Rather than focusing on one aspect of religion as many theorists do Rossano offers an all encompassing approach that is rich with surprises insights and provocative conclusions **Big Kibble**
