Characteristics of the Black-footed Ferret Donald K. Fortenberry, 1972 The black footed ferret *Mustela nigripes* has been known to science for a little more than a century It was described by Audubon and Bachman who studied a skin from Fort Laramie Goshen County Wyoming According to most authors the species was not reported again until 1876 and for those 25 years many zoologists doubted its existence

Black-footed Ferret, 1982 Conservation Biology and the Black-footed Ferret Ulysses S. Seal, 1989-01-01 The presentations and discussions clarified certain controversial issues in conservation and wildlife biology including factors influencing the viability of small wild and captive populations minimum viable population sizes in wild and captive populations and the consequences of small founder numbers for recovery of the species These papers were useful in the decision making stage of the recovery program and will assist in the return of the species to the wild the goal of a recovery program
