The Bleeding Of America:

The Bleeding of America Dana Medoro,2002-09-30 Medoro English U of Manitoba finds in the three writers works a conceptual relationship between menstrual blood and blood spilled to violence The focus of her study is the cataclysmic treatment of menstruation by the two canonical male writers but she also notes the shift in focus by the African American woman writer who at the same time employs an ominous language of menstruation Annotation copyrighted by Book News Inc Portland OR

Upper Gastrointestinal Bleeding, An issue of Gastroenterology Clinics of North America Ian M. Gralnek,2014-11-07 This issue of Gastroenterology Clinics of North America is all about acute upper GI bleeding and is divided into two distinct sections section I is devoted to nonvariceal upper GI bleeding and section II is devoted to variceal upper GI bleeding Acute nonvariceal upper GI bleeding may originate from the esophagus stomach or duodenum essentially anywhere proximal to the Ligament of Treitz In Section I Dr Gianluca Rotondano Hospital Maresca Torre del Greco Italy begins with a review of the epidemiology and diagnosis of acute nonvariceal upper GI bleeding We then turn to patient presentation risk stratification and how to initially medically manage these bleeding patients I am pleased to have one of our emergency medicine colleagues Dr Andrew Meltzer Department of Emergency Medicine George Washington University contribute this important article and provide a unique viewpoint from the emergency department where most of these patients initially present As we all know endoscopic hemostasis is the accepted standard of care for patients with acute nonvariceal upper GI bleeding Moreover peptic ulcer bleeding is the most common nonvariceal cause of acute upper GI bleeding thus Drs Yidan Lu Yen I Chen and Alan Barkun from McGill University Montreal Canada provide an in depth review of the endoscopic management of peptic ulcer bleeding Drs Eric Tjwa I Lisanne Holster and Ernst Kuipers from the Erasmus Medical Center University Hospital Rotterdam The Netherlands review the endoscopic management of all other causes of acute nonvariceal upper GI bleeding and in addition Drs Louis Wong Kee Song and Michael Levy from the Mayo Clinic Rochester Minnesota discuss emerging endoscopic hemostasis treatments such as topical sprays and over the scope clipping devices Although endoscopic hemostasis is very highly effective there are unfortunately cases where bleeding is unable to be controlled or when significant rebleeding occurs that is not amenable to endoscopic therapy Therefore I have included two articles that provide insight into the question what if endoscopic hemostasis fails The first article written by Drs Philip Wai Yan Chiu and James Yun Wong Lau from Prince of Wales Hospital The Chinese University of Hong Kong focuses on tried and true surgical treatment options The second article by Dr Sujal Nanavati University of California at San Francisco Department of Radiology and Biomedical Imaging addresses the alternative treatment strategy of angiographic embolization which has now emerged as the often preferred salvage treatment strategy

The Bleeding Disease Stephen Pemberton,2011-07-15 By the 1970s a therapeutic revolution decades in the making had transformed hemophilia from an obscure hereditary malady into a manageable bleeding disorder Yet the glory of

this achievement was short lived The same treatments that delivered some normalcy to the lives of persons with hemophilia brought unexpectedly fatal results in the 1980s when people with the disease contracted HIV AIDS and Hepatitis C in staggering numbers The Bleeding Disease recounts the promising and perilous history of American medical and social efforts to manage hemophilia in the twentieth century This is both a success story and a cautionary tale one built on the emergence in the 1950s and 1960s of an advocacy movement that sought normalcy rather than social isolation and hyper protectiveness for the boys and men who suffered from the severest form of the disease Stephen Pemberton evokes the allure of normalcy as well as the human costs of medical and technological progress in efforts to manage hemophilia He explains how physicians advocacy groups the blood industry and the government joined patients and families in their unrelenting pursuit of normalcy and the devastating unintended consequences that pursuit entailed Ironically transforming the hope of a normal life into a purchasable commodity for people with bleeding disorders made it all too easy to ignore the potential dangers of delivering greater health and autonomy to hemophilic boys and men

Pediatric Gastroenterology, An Issue of Pediatric Clinics of North America Steven J. Czinn, Samra S. Blanchard, 2017-05-22 The Guest Editors have tapped top key opinion leaders to provide current reviews on the clinical diagnosis and treatment of gastrointestinal disease in children They have focused on topics related to GERD Celiac Disease and Gluten Sensitivity IBD Motility Disorders GI Bleeding and Management Pancreatic Disorders Hepatitis B and C Liver Transplant Abdominal Pain Complications from Obesity and Neonatal Cholestasis These articles will provide a state of the art overview of diagnosis and treatment of GI diseases that are impactful for the general pediatrician

Cuordileone, 2012-11-12 Manhood and American Political Culture in the Cold War explores the meaning of anxiety as expressed through the political and cultural language of the early cold war era Cuordileone shows how the preoccupation with the soft malleable American character reflected not only anti Communism but acute anxieties about manhood and sexuality Reading major figures like Arthur Schlesinger Jr Adlai Stevenson Joseph McCarthy Norman Mailer JFK and many lesser known public figures Cuordileone reveals how the era's cult of toughness shaped the political dynamics of the time and inspired a reinvention of the liberal as a cold warrior **Primary Care E-Book** Terry Mahan Buttar, JoAnn
