Ecological Genetics and Air Pollution George E. Jr. Taylor, Louis F. Pitelka, Michael T. Clegg, 2012-12-06 Human activities influence the chemical and physical properties of the atmosphere examples are increases in troposphere concentrations of ozone carbon dioxide oxides of nitrogen and sulfur heavy metals and UV B radiation Many of these changes can alter the physiological status of terrestrial vegetation through either inhibition or enhancement of growth and reproduction thereby influencing the ability of sensitive plants to compete for limited resources As a result air pollution stress may be changing the genetic structure of plant populations In this book leading researchers with a broad interdisciplinary range of expertise discuss the known and measurable effects of pollution on terrestrial vegetation within the framework of ecological genetics as well as suitable experimental methodologies to analyze the often novel or unusual effects of such environmental stresses For environmental researchers and managers *Ecological Genetics and Air Pollution* will be a welcomed introduction to this field of growing importance for long term ecological studies

Environmental Pollution and Plant Responses Shashi Bhushan Agrawal, Madhoolika Agrawal, 2023-01-30 Comprehensive and global in scope *Environmental Pollution and Plant Responses* provides an analysis of the research on the factors contributing to the deteriorating environmental quality and its effect on plant performance The issues include environmental pollution and global climate change response patterns of plants at different levels mechanisms of interaction tolerance strategies and future research prospects The author evaluates trends and gives management strategies for abating the problem This volume highlights the complexities of environmental problems and the affect of pollution on every level of the ecosystem

Sulphur in Plants Y.P. Abrol, A. Ahmad, 2013-06-29 Sulphur S plays a pivotal role in various plant growth and development processes being a constituent of sulphur containing amino acids cysteine and methionine and other metabolites viz glutathione and phytochelatins co factor of enzymes which contribute to stress repair and amelioration of heavy metal toxicity Besides a number of S containing components are biologically active and thus a source for use as medicinal value The basic global issue before the agricultural scientist and world community is to evolve cultivars and develop methodologies for efficient use of inputs to enhance agricultural productivity This is particularly true of the developing countries which are going to see maximum rise in population with changing food demands and declining availability of land Amongst the inputs nutrients play a crucial role The major requirement is for N P and K followed by several micro nutrients In this context reports of world wide S deficiency in the agricultural systems are relevant The reasons are many Broadly speaking reduction in S emission use of S free N P and K fertilizers and higher biomass production

contributed the maximum Despite the need for sulphur as an essential plant nutrient and the substantial returns expected from its use very little attention has been given to fill the gap between supply and demand of S Air Pollution Effects on Biodiversity J.R. Barker,D.T. Tingey,2012-12-06 Biodiversity is the delicate ecological balance within biological systems such as species and populations Evidence suggests air pollution disrupts and impoverishes ecosystems processes and genetic and population diversity Based on a symposium conducted by the EPA s Environmental Research Laboratory this book pulls together current knowledge on the subject assesses its relevance and offers a framework for future research on the impact of air pollution on biodiversity through all levels of biological organization This text is particularly timely due to acid rain and other toxic problems The text also discusses the best available control technology management practices alternative chemicals and legislative ways to reduce the impact of air pollution on biodiversity Improving Crop Resistance to Abiotic Stress Narendra Tuteja,Sarvajeet S. Gill,Antonio F. Tiburcio,Renu Tuteja,2012-04-30 The latest update on improving crop resistance to abiotic stress using the advanced key methods of proteomics genomics and metabolomics The wellbalanced international mix of contributors from industry and academia cover work carried out on individual crop plants while also including studies of model organisms that can then be applied to specific crop plants
