2022 Such sweeping changes to their statecraft and authority structures could well end up having a direct impact for better or worse on policies economies and individual lives all around the world Christopher M Davidson tests the hypothesis that Saudi Arabia and the UAE are now effectively contemporary or even advanced sultanates and situates these influential states within an international model of autocratic authoritarianism Drawing on a range of primary sources including new interviews and surveys From Sheikhs to Sultanism puts forward an original empirically grounded interpretation of the rise of both MBS and MBZ
