Sun Is Hot:

When Grown Ups Cry Jasna Jackson, 2012-09-21 Yoyo was interesting because she was always having a lot of secrets and she never shared them sometimes maybe with anyone She felt that if she will talk about it those words and things will disappear so she rather was just listening and observing and was quiet The book is about a growing up girl She was adopted and she sees things a bit different and since she was little she loves the stars the most First she saw them on the sky at night than as people too Space Times Matter Michael Albrow, 2025-03-25 Do you wonder how the sun and stars work and what are subatomic particles Have you heard of dark matter and dark energy but don't know what they are neither do physicists so join the club What is space what is time and is it forever How come the universe is just right for life and are there other universes Welcome to the frontiers of knowledge In this collection of one hundred short science stories Albrow addresses these and many other fascinating questions The pieces are meant to be self contained so there is some repetition you are invited to browse read one today and another tomorrow in no particular order These stories could be used by a science teacher to inspire a class to dig deeper No math is required there are almost no equations Some stories about space and time include Albrow's original ideas The collection concludes with eighteen original science poems Michael Albrow has been doing research in subatomic particle physics for sixty years since graduating from Birmingham University United Kingdom in 1964 A former professor at Stockholm University he is now scientist emeritus at Fermilab near Chicago and is a fellow of the Institute of Physics and the American Physical Society for outreach and education Albrow was on the teams that discovered the heaviest known particle the top quark at Fermilab and the Higgs Boson the God particle at CERN in Geneva
