fisheries management regimes and what is known about a range of fisheries issues such as the impacts of trawling on marine ecosystems Ocean Recovery is aimed principally at a general audience that is already interested in fisheries but seeks both a deeper understanding of what is known about specific issues and an impartial presentation of all the data rather than selected examples used to justify a particular perspective or agenda It will also appeal to the scientific community eager to know more about marine fisheries and fishing data and serve as the basis for graduate seminars on the sustainability of natural resources Report on the Conditions of the Sea Fisheries of the South Coast of New England United States.
