Suicide Intended:

Suicide-Related Behaviour Columba McLaughlin, 2007-06-29 The book is an attempt to make sense of suicide related behaviour in terms of understanding its aetiology and how practitioners can respond in a caring and therapeutic manner The last 30 years the data gathered has consistently indicated that suicide is a leading cause of death in young people especially men Alongside this the incidence of self harm which has always been high does not seem to be abating Some professionals argue that attempted suicide and self harm are both the same entity This book puts forward that they are two sides of the same coin and this coin is called suicide related behaviour This is a general term used in the book to describe all behaviours where the person intended to kill or harm themselves In doing so relevant issues within the phenomenon of suicide related behaviour and specific to both self harm and attempted suicide will be explored and addressed

Contemplating Suicide Gavin J Fairbairn, Gavin Fairbairn, 2003-09-02 Suicide is devastating It is an assault on our ideas of what living is about In *Contemplating Suicide* Gavin Fairbairn takes fresh look at suicidal self harm His view is distinctive in not emphasising external facts the presence or absence of a corpse along with evidence that the person who has become a corpse intended to do so It emphasises the intentions that the person had in acting rather than the consequences that follow from those actions Much of the book is devoted to an attempt to construct a natural history of suicidal self harm and to examine some of the ethical issues that it raises Fairbairn sets his philosophical reflections against a background of practical experience in the caring professions and uses a storytelling approach in offering a critique of the current language of self harm along with some new ways of thinking Among other things he offers cogent reasons for abandoning the mindless use of terms such as attempted suicide and parasuicide and introduces a number of new terms including cosmic roulette which he uses to describe a family of human acts in which people gamble with their lives By elaborating a richer model of suicidal self harm than most philosophers and most practitioners of caring professions currently inhabit Fairbairn has contributed to the development of understanding in this area Among other things a richer model and vocabulary may reduce the likelihood that those who come into contact with suicidal self harm will believe that familiarity with the physical facts of the matter the actions of the suicider and the presence or absence of a corpse is always sufficient to justify a definite conclusion about the nature of the self harming act

Assisted Suicide and the European Convention on Human Rights Stevie Martin, 2021-04-12 Locating assisted suicide within the broader medical end of life context and drawing on the empirical data available from the increasing number of permissive jurisdictions this book provides a novel examination of the human rights implications of the prohibition on assisted suicide in England and Wales and beyond Assisted suicide is a contentious topic and one which has been the subject of judicial and academic debate internationally The central objective of the book is to approach the question of the ban s compatibility with the European Convention on Human Rights afresh freed from the constraints of the existing case law and its erroneous approach to the legal issues and selective reliance on empirical data The book also examines the

compatibility of the ban on assisted suicide with rights which have either been erroneously disregarded or not considered by either the domestic courts or the European Court of Human Rights Having regard to human rights jurisprudence more broadly including in the context of abortion the research and analysis undertaken here demonstrates that the ban on assisted suicide violates the rights of a significant number of individuals to life to freedom from torture or inhuman or degrading treatment and to private life Such analysis does not depend on a strained or contrived approach to the rights at issue Rather the conclusions flow naturally from a coherent logical application of the established principles governing those rights While the focus of the book is the Suicide Act 1961 the conclusions reached have implications beyond England and Wales including for the other devolved jurisdictions and international jurisdictions Beyond courts and legislators it will be a valuable resource for students of human rights and medical law as well as medical and legal practitioners and academics working in human rights and end of life care

Suicides and Attempted Suicides in the Union Territory of Delhi Vimala

Veeraraghavan,1985 **Suicide and Homicide-Suicide Among Police** Antoon Leenaars,Dale Lund,2017-07-28 The goal of this book is to fully explore what the author refers to as the near epidemic levels of suicide and homicide suicide among law enforcement officers and ultimately to offer recommendations and best practices with which to better address the problem The book begins by discussing suicide in some depth for one has to know suicide unequivocally to understand a suicidal or homicidal suicidal officer Suicide and homicide suicide are complex multi determined events the result of an interplay of individual relational social cultural and environmental factors The complexity of causation necessitates a parallel complexity of knowledge There are at least two avenues to understanding the nomothetic general approach which deals with generalizations using empirical statistical and demographic methods or techniques and the idiographic specific approach which typically involves the intense study of individuals This book explores both Attempting to be mindful of the needs of the office on the street the mental health provider the administrator the forensic specialist and the survivors of these needless tragedies the belief is that by amalgamating the concerns of a diverse audience we can meet the challenge of identifying at risk individuals and situations and saving lives

[The Case Against Assisted Suicide](#) Kathleen M. Foley,Herbert

Hendin,2004-04-29 In *The Case against Assisted Suicide For the Right to End of Life Care* Dr Kathleen Foley and Dr Herbert Hendin uncover why pleas for patient autonomy and compassion often used in favor of legalizing euthanasia do not advance or protect the rights of terminally ill patients Incisive essays by authorities in the fields of medicine law and bioethics draw on studies done in the Netherlands Oregon and Australia by the editors and contributors that show the dangers that legalization of assisted suicide would pose to the most vulnerable patients Thoughtful and persuasive this book urges the medical profession to improve palliative care and develop a more humane response to the complex issues facing those who are terminally ill

Race and Suicide in South Africa Fatima Meer,2022-10-05 Originally published in 1976 *Race and Suicide in South Africa* synthesises the two dimensions of suicide the personal and the social phenomenon Its approach is

Durkheimian in the use of court records and phenomenological in the examination of actual cases About 1500 cases of suicide in Durban from 1940-70 are analysed in terms of race sex occupation marital status economic status family type and size residential area time and method used What emerges is a revealing picture of suicide in South African ethnic groups The findings confute the idea of Durkheim and others that behaviour in suicide conforms to certain universal principles and suggest the crucial role of particular social conditions in determining suicide trends while at the same time challenging the proposition that a high suicide rate is associated with high status Instead the author found that there were common emotional syndromes among suicides but these were contributed to by different social factors

Cognitive Behavioural Prevention of Suicide in Psychosis Nicholas Tarrier, Patricia Gooding, Daniel Pratt, 2013 This practical and informative text lays out the product of a number of years of clinical research into suicide behaviour and its prevention While the focus is on non affective psychosis and the schizophrenia spectrum disorders the mechanisms underlying suicide behaviour in this group may well underlie or at least influence suicide behaviour in other disorders The authors describe methods of assessment through individual formulation and a cognitive behavioural intervention through case studies to reduce the risk of suicide This book argues that Suicide behaviour lies on a cognitive behavioural continuum from ideation through intention to action Mechanisms based on biased information processing systems the development of suicide schema and appraisal styles are likely to be fruitful in explaining suicidal thoughts and behaviours A psychological theory of suicide behaviour is needed in order to develop a mechanism of suicide and to understand the components of suicidal thoughts and behaviours Suicide risk can be reduced through the use of the intervention methods described within the text Cognitive Behavioural Prevention of Suicide in Psychosis evaluates practical applications of contemporary research on this topic and will therefore be of interest to practitioners post graduates in training and researchers studying suicide and or psychosis

Psychopathology, Print and Interactive E-Text Ann M. Kring, Sheri L. Johnson, 2023-09-15
