

PSYCHOLOGY

SUICIDE

the gamble with death

By Gene Lester and David Lester

MYTH: People who talk about suicide do not commit suicide.

FACT: Of any ten people who commit suicide, eight have given definite warnings of their intentions.

MYTH: Suicidal people do not wish to be saved.

FACT: Most suicidal people are undecided about whether suicide is really the way out; they often unconsciously give others the chance to save them.

In this volume Gene and David Lester take a realistic look at our alarming suicide rate and investigate some of the reasons why so many people become suicide victims. Based on case studies taken from centers for suicide research and prevention and on the findings of noted psychologists, this book reveals how such factors as age, sex, race, and alcohol and drug use affect suicide attempts and actual completions. The authors show that, contrary to common belief, specific cases of suicide can often be predicted, and stress that if the public learns to take suicide threats more seriously, tragedy can often be averted.
