Suitang Changan A Study In The Urban History Of Late Medieval China:

The Oxford Handbook of Cities in World History Peter Clark, 2013-02-14 In 2008 for the first time the majority of the planet's inhabitants lived in cities and towns. Becoming globally urban has been one of mankind's greatest collective achievements over time and raises many questions: How did global city systems evolve and interact in the past? How have historic urban patterns impacted on those of the contemporary world? And what were the key drivers in the roller coaster of urban change over the millennia: market forces such as trade and industry, rulers and governments, competition and collaboration between cities, or the urban environment and demographic forces? This pioneering comparative work by leading scholars drawn from a range of disciplines offers the first detailed comparative study of urban development from ancient times to the present day. The Oxford Handbook of Cities in World History explores not only the main trends in the growth of cities and towns across the world in Asia and the Middle East, Europe, Africa and the Americas, and the different types of cities from great metropolitan centres to suburbs, colonial cities and market towns, but also many of the essential themes in the making and remaking of the urban world: the role of power, economic development, migration, social inequality, environmental challenge and the urban response, religion and representation, cinema and urban creativity. Split into three parts covering Ancient cities, the medieval and early modern period, and the modern and contemporary era, it begins with an introduction by the editor identifying the importance and challenges of research on cities in world history, as well as the crucial outlines of urban development since the earliest cities in ancient Mesopotamia to the present. **City of Marvel and Transformation**

Linda Rui Feng, 2015-07-31 During the Tang dynasty the imperial capital of Chang'an (present-day Xi'an) was unrivaled in its monumental scale, with about one million inhabitants dwelling within its walls. It was there that one of the most enduring cultural and political institutions of the empire, the civil service examinations, took shape, bringing an unprecedented influx of literati men to the city seeking recognition and official status by demonstrating their literary talent. To these examination candidates, Chang'an was a megalopolis, a career launch pad and most importantly, a cultural paradigm. As a multifaceted lived space, it captured the imaginations of Tang writers, shaped their future aspirations, and left discernible traces in the writings of this period. *City of Marvel and Transformation* brings this cityscape to life together with the mindscape of its sojourner writers. By analyzing narratives of experience with a distinctive metropolitan consciousness, it retrieves lost connections between senses of the self and a sense of place. Each chapter takes up one of the powerful shaping forces of Chang'an: its siren call as a destination, the unforeseen nooks and crannies of its urban space, its potential as a media machine to broadcast images and reputations, its *demimonde*, a city within a city where both literary culture and commerce took center stage. Without being limited to any single genre-specific movement or individual author, the texts examined in this book highlight aspects of Chang'an as a shared and contested space in the collective imagination. They bring to our attention a newly emerged interval of social, existential and geographical mobility in the lives of educated men who, as aspirants and routine

capital bound travelers learned to negotiate urban space Both literary study and cultural history City of Marvel and Transformation goes beyond close readings of text it also draws productively from research in urban history anthropology and studies of space and place building upon the theoretical frameworks of scholars such as Michel de Certeau Henri Lefebvre and Victor Turner It is a welcome addition to the growing body of scholarship in Chinese studies on the importance of cities and city life Students and scholars of premodern China will find new ways to understand the collective concerns of the lettered class as well as new ways to understand literary phenomena that would eventually influence vernacular tales and the Chinese novel By asking larger questions about how urban sojourns shape subjectivity and perceptions this book will also attract a wide range of readers interested in studies of personhood spatial practice and cities as living cultural systems in flux both ancient and modern
