Design - Convolute Håkan Gulliksson, The home is under siege both because it is an enormous potential market and because of changing human behaviours It is also interesting as a platform for new technology and for analysis of everyday life as in this essay We will describe the home as a context where the interactors are humans inhabitants things artefacts in the home and information The interactions at home are activities and routines This essay presents and structures quotes and thoughts on the organization and decoration of the home another huge topic To limit the scope somewhat we will look for theory to discuss only related to homes of the western middle class The essay is yet another piece in a puzzle to understand information technology in the future Space Structures 5 G. Urban Blue Spaces Simon Bell,Lora E. Fleming,James Grellier,Friedrich Kuhlmann,Mark J. Nieuwenhuijsen,Mathew P. White,2021-09-30 This book presents an evidence based approach to landscape planning and design for urban blue spaces that maximises the benefits to human health and well being while minimising the risks Based on applied research and evidence from primary and secondary data sources stemming from the EU funded BlueHealth project the book presents nature based solutions to promote sustainable and resilient cities Numerous cities around the world are located alongside bodies of water in the form of coastlines lakes rivers and canals but the relationship between city inhabitants and these water sources has often been ambivalent In many cities water has been polluted engineered or ignored completely But due to an increasing awareness of the strong connections between city people nature and water and health this paradigm is shifting The international editorial team consisting of researchers and professionals across several disciplines leads the reader through theoretical aspects evidence illustrated case studies risk assessment and a series of validated tools to aid planning

and design before finishing with overarching planning and design principles for a range of blue space types Over 200 full colour illustrations accompany the case study examples from geographic locations all over the world including Portugal the United Kingdom China Canada the US South Korea Singapore Norway and Estonia With green and blue infrastructure now at the forefront of current policies and trends to promote healthy sustainable cities Urban Blue Spaces is a must have for professionals and students in landscape planning urban design and environmental design Open Access for the book was funded by the European Union s Horizon 2020 research and innovation programme under grant agreement No 666773 The Open Access version of this book available at www.taylorfrancis.com/books/oa/edit/10.4324/9780429056161 has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license **ICAUTO-95** Pradip K. triggers memory It explores how architecture exists as a material object and how it registers as a place that we come to remember beyond the physical site itself It questions what architecture is in the broadest sense assuming that it is not simply buildings Rather architecture is considered to be the mapping of physical mental or emotional space The idea that we are all architects in some measure as we actively organize and select pathways and markers within space is central to this book's premise Each chapter provides a different example of the manifold ways in which the physical place of architecture is curated by the architecture in our mental space our imaginary toolbox when we think of a place and look at a photograph or visit a site and describe it later or send a postcard By connecting architecture with other disciplines such as geography visual culture sociology and urban studies as well as the fine and performing arts this book puts forward the idea that a conversation about architecture is not exclusively about formal isolated buildings but instead must be deepened and broadened as spatialized visualizations and experiences of place

Space Syntax Laura Vaughan, John Peponis, Ruth Conroy Dalton, 2025-04-30 Professor Bill Hillier spent most of his career at The Bartlett University College London where he founded and developed with a team of colleagues an original research programme that set the study of architecture on a firm scientific basis His transformational way of thinking about buildings and cities influenced generations of scholars researchers and practitioners within the built environment disciplines and way beyond in fields ranging from archaeology and biology to physics and zoology Space Syntax Selected papers by Bill Hillier provides a canon of works that reflects the progression of Hillier's ideas from the early publications of the 1970s to his most recent work published before his death in 2019 This selection of influential works ranges from his papers on architecture as a professional and research discipline through to his later papers that present a theory of the spatial structure of the city and its social functions By bringing together writing from across his career span of half a century with specially commissioned introductions by a wide range of international experts in the field we are able to contextualise and show the range and evolution of Hillier's key ideas
