

SIX ESSAYS IN COMPARATIVE SOCIOLOGY

ANDRE BETEILLE

SOCIOLOGY AND SOCIAL ANTHROPOLOGY

Q. Examine the relationship between Sociology and Social Anthropology with special reference to the Indian Context.

The book "The Six Essays in Comparative Sociology" by "Andre Beteille" was published in 1974. It explores important topics in sociology and anthropology and relates them to contemporary Indian peasant society. Its first chapter "Sociology and Social Anthropology" examines the relationship between the two disciplines and cites the commonalities as well as the distinctions between them.

According to Andre Beteille, it is useful to examine the relationship between sociology and social anthropology as it has taken shape over time in order to see more clearly the work done by scholars in these fields in India today. He believes that a purely formal discussion of the subject will not be very useful any longer: a discussion at this stage will serve a purpose only if it creates a deeper awareness of the work in which we are actually engaged.

Beteille believes that we should take a critical look at the prevailing division of work among students of human society and culture. He states that one might feel that ideally this division of work should be the same throughout the world but we know that in reality this is not the case. The difference between sociology and social anthropology is not the same in France and Britain. Anglophone countries have maintained a distinction between the two which was sharpest in the period between the two World Wars.

He further states that the division of labour between Sociology and Social Anthropology emerged in Britain or United States under specific historic conditions and was then Transmitted to other countries where conditions were different. A proper division of work among students of human society can be established only on the basis of their ultimate academic objectives and their actual academic concerns. But in dealing with the relationship between Sociology and

Six Essays in Comparative Sociology André Béteille, 1976 **Essays in Comparative Sociology** André Béteille, 1987

This new edition of Béteille's *Six Essays in Comparative Sociology* which explores important topics in sociology and anthropology and relates them to contemporary Indian peasant society features two new essays on Marxism and new appendices on ethnosociology and concepts of the tribe **Anthropological Journeys** Meenakshi Thapan, 1998 This collection of papers raises methodological issues and questions concerning the traditional nature of anthropology and addresses current issues and debates in sociology and social anthropology The essays in this volume by well known anthropologists take up these and other issues arising out of their own fieldwork experience The result is a rigorous and deeply moving analysis that leads to an unlearning of inappropriate and insensitive methods that obscure rather than explain the lives of people **We Were Adivasis** Megan Moodie, 2015-08-20 Anthropologist Megan Moodie examines the Indian state's relationship to scheduled tribes or adivasis historically oppressed groups that are now entitled to affirmative action quotas in educational and political institutions Through a deep ethnography of the Dhanka in Jaipur Moodie brings readers inside the creative imaginative work of these long marginalised tribal communities *The Impact of China's Belt and Road Initiative in Southeast Asia* Yos Santasombat, Kian Cheng LEE, 2025-02-24 Drawing insights from intensive empirical investigation of the Belt and Road Initiative BRI projects in various Southeast Asian countries this book assesses and analyzes the continuing impact of China's BRI on Thailand and ASEAN at a critical period of Southeast Asian history Over the past decade the BRI a large flagship foreign policy effort of President Xi Jinping has had a significant economic political and environmental impact across the world Since its inception the BRI has remained shrouded in confusion and controversy The Covid 19 pandemic also presented additional challenges for our understanding of the BRI that warrant further exploration This volume places special focus on special economic zones SEZs and high speed train projects and comparatively examines and critically analyzes the risks and benefits stemming from these megaprojects Breaking away from existing academic studies on the BRI which have been largely based on macro analysis with a top down approach and theoretical deliberation this book focuses on local realities with a qualitative approach to identify the potential impact of the BRI on the development of ASEAN countries By way of a bottom up empirically rich first hand ethnographic account of the risks and benefits of the BRI projects at the local national and regional levels in ASEAN this book makes a substantial contribution to multiple disciplinary arenas from anthropology sociology and history to political science and international relations with particular relevance to those researching China and its relationships with Southeast Asia **Food Cultures of India**, 2025-10-27 In recent times Food Studies has emerged as an important interdisciplinary field of enquiry situated at the convergence point of many disciplines Food Studies is not just about the study of food itself One could argue that the trajectory of development of Food Studies has been along the similar lines as Cultural Studies which also is not only about the study of culture per se

Food Studies deals with more than the mere production consumption aesthetic appreciation and cataloguing of food related practices It provides the vantage point to look at the relationship between food and people from the variety of perspectives offered by disciplines such as arts science management technology sociology cultural studies economics health social justice literature anthropology and history In the context of these exciting developments the present volume brings together a collection of essays written by academics and scholars belonging to a wide range of disciplines and who have brought in their subject expertise towards analysing various dimensions of Food Studies covering its interface with folklore social practices fictional representation famines memory and media studies

Land Reforms in India, Theory and Practice

Bikram Sarkar,1989 **German Peasants and Agrarian Politics, 1914-1924** Robert G. Moeller,2017-10-10 Robert Moeller investigates the German peasantry's rejection of the Weimar Republic in the 1920s and provides a new interpretation of Catholic peasant conservatism in western Germany According to Moeller rural support for conservative political solutions to the troubled Weimar Republic was the result of a series of severe economic jolts that began in 1914 and continued unabated until 1933 During the late nineteenth century peasant farmers in the Rhineland and Westphalia adjusted their production to a capitalist market and enjoyed an unprecedented period of prosperity that lasted until the outbreak of World War I After August 1914 peasant producers confronted state intervention in the agricultural sector regulation of prices and markets and the subordination of agrarian interests to the demands of urban consumers A controlled economy for many agricultural products continued into the postwar period Focusing on the Catholic peasantry Moeller shows that peasant rejection of the Weimar Republic was firmly grounded in the immediate circumstances of the war economy and the uneven process of postwar recovery He challenges the dominant view that rural support for conservative political solutions was primarily the product of the peasantry's hostility toward industrial capitalism and of long term social and political affinities dating from the nineteenth century Moeller's findings show that conservative agrarian ideology was carefully formulated in response to the specific peasant grievances that originated in this period of continuing economic and political crisis
