Focus on Epilepsy Research Shawn M. Benjamin, 2004 Epilepsy also called seizure disorder is a condition of the brain marked by a susceptibility to recurrent seizures Epilepsy affects 1 per cent to 2 per cent of the population In about half the cases of epilepsy the cause is unknown However some possible causes of epilepsy include birth trauma perinatal infection anoxia infectious diseases ingestion of toxins tumours of the brain inherited disorders or degenerative disease head injury or trauma metabolic disorders cerebrovascular accident and alcohol withdrawal This volume presents international research on the prevention pathogenesis diagnosis and treatment of epilepsy

Habituation Thomas J. Tighe, Robert N. Leaton, 2016-07-15 Originally published in 1976 this volume is based on a conference held in 1974 The purpose of the conference was to foster communication between those researchers studying habituation or closely related processes in children and those studying habituation at the level of neurophysiology and animal behaviour Within each of these groups there was burgeoning interest in habituation yet there had been little if any interaction between them Overall this volume provides a medium for cross fertilization between animal neurophysiological and developmental research on habituation highlighting some of the current empirical and theoretical concerns within each area at the time While other volumes may have provided more comprehensive and detailed reviews of aspects of habituation the juxtaposition of developmental and animal neuro physiological research provided in this text was unique in the literature at the time
