E. Wolf, 2006 Subjectivity the speaker s expression of self in discourse is a relatively under researched area in the field of applied linguistics this book examines the role of subjectivity in the context of second language use Drawing on insights from discourse analysis and pragmatics it describes how a group of students studying French at degree level at the University of Cambridge England convey expressions of subjectivity in personal narratives and argumentative language In this book the author begins by introducing the reader to key areas in the study of discourse Using a methodology that has much in common with descriptive linguistics he provides a wide ranging account of how forms in language are used to convey the expression of subjectivity His particular concern is to examine how these markers of subjectivity are used differently by native and non native speakers of French The discussion is carefully supplemented throughout with a variety of exemplification and discourse types including personal narratives in French and English and transcripts of video taped interactions in role plays In the course of his analysis the author questions long held assumptions about the way French is taught in secondary schools and in higher education institutions The range of issues discussed as well as the variety of examples used will make this a valuable book not only for students of applied linguistics but also for any reader wishing to gain a deeper understanding of how the expression of subjectivity can contribute to the learning of a second language **The Anthropology of Learning in Childhood** David F. This is the fully revised and expanded second edition of English One Tongue Many Voices a book by three internationally distinguished English language scholars who tell the fascinating improbable saga of English in time and space Chapters trace the history of the language from its obscure beginnings over 1500 years ago as a collection of dialects spoken by marauding illiterate tribes They show how the geographical spread of the language in its increasing diversity has made English into an international language of unprecedented range and variety The authors examine the present state of English as a global language and the problems pressures and uncertainties of its future online and offline They argue that in spite of the amazing variety and plurality of English it remains a single language *Staging Language* Urszula Clark,2019-01-14

Although there are many studies on linguistic variation as it relates to both traditional and new media such as film TV newspapers and online behavior little has been written about spoken performance in overt but face to face conversations This book bridges that gap and focuses on an in between zone between casual face to face conversations and the type of heavily scripted language of most traditional spoken media The book draws upon a substantial amount of empirical data in its investigation of the role played by performance texts in creating maintaining and challenging imagined communities and focuses upon the ways in which performance contributes to people s sense of the kinds of use for which dialect variational use is appropriate and those for which it is not It sheds light on how such stylization intersects with multiple social indexes and how performers and other creative artists challenge and mock hegemonic practices through

enregistering a defined set of linguistic variables in the context of their performance and other associated written texts

A Marriage of Philosophy and Music Erich Welling, 2014-04 How to use philosophy and music to open your horizons and enjoy being yourself put theory to work and help you experience personal growth is discussed in A Marriage of Philosophy and Music It is all about after After having a liberal education you are comfortable in modern culture and after further education and becoming a specialist in some field you enjoy using your skills We learn the ideas and methods of many social cultures and our own chosen specialty but we often neglect the liberal art of disciplining and enjoying the ideas and methods of our own individuality This book offers a path toward the education of privacy with the key words being selection design and beauty The book relates five areas of general human interest spirituality philosophy science art and body awareness The interrelation is accomplished by using personal patterns of experience that are available from philosophy and music Because of the plurality of subject matters and methods used in philosophy and music their patterns of discipline are comparable to self discipline A Marriage of Philosophy and Music attempts to create a path in this direction because besides the enjoyment of social culture and personal skills there is enjoyment in being yourself which is a neglected liberal art
