**Barnstorming the Prairies** Jason Weems, 2015-12-29 To Midwesterners tucked into small towns or farms early in the twentieth century the landscape of the American heartland reached the horizon and then imagination had to provide what lay beyond But when aviation took off and scenes of the Midwest were no longer earthbound the Midwestern landscape was transformed and with it Jason Weems suggests in this book the very idea of the Midwest itself Barnstorming the Prairies offers a panoramic vista of the transformative nature and power of the aerial vision that remade the Midwest in the wake of the airplane This new perspective from above enabled Americans to conceptualize the region as something other than isolated and unchanging and to see it instead as a dynamic space where people worked to harmonize the core traditions of America's agrarian character with the more abstract forms of twentieth century modernity In the maps and aerial survey photography of the Midwest as well as the painting cinema animation and suburban landscapes that arose through flight Weems also finds a different and provocative view of modernity in the making In representations of the Midwest from Grant Wood's iconic images to the Prairie style of Frank Lloyd Wright to the design of greenbelt suburbs Weems reveals aerial vision's fundamental contribution to regional identity to Midwesternness as we understand it Reading comparatively across these images Weems explores how the cognitive and perceptual practices of aerial vision helped to resymbolize the Midwestern landscape amid the technological change and social uncertainty of the early twentieth century

**Cities and Nature in the American West** Char Miller, 2010-09-28 In less than a century the American West has transformed from a predominantly rural region to one where most people live in metropolitan centers Cities and Nature in the American West offers provocative analyses of this transformation Each essay explores the intersection of environmental urban and western history providing a deeper understanding of the complex processes by which the urban West has shaped and been shaped by its sustaining environment The book also considers how the West's urban development has altered the human experience and perception of nature from the administration and marketing of national parks to the consumer roots of popular environmentalism the politics of land and water use and the challenges of environmental inequities A number of essays address the cultural role of wilderness nature and such activities as camping Others examine the increasingly pervasive power of the West's urban areas and urbanites to redefine the very foundations and future of the American West

2016 Shortlisted for the ISA Book Prize Mainstream historical accounts of the development of capitalism describe a process which is fundamentally European a system that was born in the mills and factories of England or under the guillotines of the French Revolution In this groundbreaking book a very different story is told How the West Came to Rule offers a interdisciplinary and international historical account of the origins of capitalism It argues that contrary to the dominant wisdom capitalism s origins should not be understood as a development confined to the geographically and culturally sealed borders of Europe but the outcome of a wider array of global processes in which non European societies played a decisive role Through an outline of the uneven histories of Mongolian expansion New World discoveries Ottoman Habsburg rivalry the development of the Asian colonies and bourgeois revolutions Alexander Anievas and Kerem Nisancioglu provide an account of how these diverse events and processes came together to produce capitalism Politics, Property and Production in the

**Absentee Landowning and Exploitation in West Virginia, 1760-1920** Barbara Rasmussen, 2014-07-11 Absentee landowning has long been tied to economic distress in Appalachia In this important revisionist study Barbara Rasmussen examines the nature of landownership in five counties of West Virginia and its effects upon the counties economic and social development Rasmussen untangles a web of outside domination of the region that commenced before the American Revolution creating a legacy of hardship that continues to plague Appalachia today The owners and exploiters of the region have included Lord Fairfax George Washington and most recently the U S Forest Service The overarching concern of these absentee landowners has been to control the land the politics the government and the resources of the fabulously rich Appalachian Mountains Their early and relentless domination of politics assured a land tax system that still favors absentee landholders and simultaneously impoverishes the state Class differences a capitalistic outlook and an ethic of growth and development pervaded western Virginia from earliest settlement Residents however were quickly outspent by wealthier more powerful outsiders Insecurity in landownership Rasmussen demonstrates is the most significant difference between early mountain farmers and early American farmers everywhere *Promised Lands* David M. Wrobel, 2002 Whether seen as a land of opportunity or as paradise lost the American West took shape in the nation s imagination with the help of those who wrote about it but two groups who did much to shape that perception are often overlooked today Promoters trying to lure settlers and investors to the West insisted that the frontier had already been tamed that the only frontiers remaining were those of opportunity Through posters pamphlets newspaper articles and other printed pieces these boosters literally imagined places into existence by depicting backwater areas as settled culturally developed regions where newcomers would find none of the hardships associated with frontier life Quick on their heels some of the West s original settlers had begun

publishing their reminiscences in books and periodicals and banding together in pioneer societies to sustain their conception of frontier heritage Their selective memory focused on the savage wilderness they had tamed exaggerating the past every bit as much as promoters exaggerated the present Although they are generally seen today as unscrupulous charlatans and tellers of tall tales David Wrobel reveals that these promoters and reminiscers were more significant than their detractors have suggested By exploring the vast literature produced by these individuals from the end of the Civil War through the 1920s he clarifies the pivotal impact of their works on our vision of both the historic and mythic West In examining their role in forging both sense of place within the West and the nation s sense of the West as a place Wrobel shows that these works were vital to the process of identity formation among westerners themselves and to the construction of a West in the national imagination Wrobel also sheds light on the often elitist sometimes racist legacies of both groups through their characterizations of Native Americans African Americans Mexican Americans and Asian Americans In the era Wrobel examines promoters painted the future of each western place as if it were already present while the old timers preserved the past as if it were still present But as he also demonstrates that West has not really changed much promoters still tout its promise while old timers still try to preserve their selective memories Even relatively recent western residents still tap into the region s mythic pioneer heritage as they form their attachments to place Promised Lands shows us that the West may well move into the twenty first century but our images of it are forever rooted in the nineteenth

**Industry and Politics in West Germany** Peter J. Katzenstein, 2018-08-06 Dynamic technological developments in industrial production the rise of new social movements in national politics and great changes in the international political economy have left a deep imprint on the Federal Republic A compelling explanation of West Germany s success in maintaining economic prosperity and political stability under such challenging conditions has continued to elude observers Under the editorship of Peter J Katzenstein thirteen distinguished scholars from both sides of the Atlantic here provide an original interpretation of the political economy of the Bonn Republic during the forty years since its founding and explore in particular its extraordinary capacity for accommodating change Whereas studies in political economy have typically focused on one level of political action either the shop floor or national politics or the international system this innovative account analyzes the interaction of change at all three levels bringing together case studies drawn from six manufacturing and service sectors

*Utilization, Misuse, and Development of Human Resources in the Early West Indian Colonies* M.K. Bacchus, 2006-01-01 This comprehensive study of the development of education in the West Indies between 1492 and 1854 examines the shifts which occurred within the nature of the education programs provided for the masses Believing existing theories of educational change are too limiting Bacchus has blended detailed analysis of such important factors as the changing role of the state the conflicting educational objectives among the dominant groups and their differences with the missionary societies providing popular education to better understand how these changes came about He attributes greater importance to the role of the

masses who increasingly asserted their views about the type of education they wanted for their children The book demonstrates how instructional programs developed in the West Indies not as the result of a rational curriculum development process but rather through a series of compromises made to accommodate the views of various influential groups Education and curriculum evolved by way of a show yet constant changing dialectical process Such an insightful work will arouse the interest of scholars and students of educational development particularly those studying the West Indies

**Trafficking with Demons** explores how magic was perceived practiced and prohibited in western Europe during the first millennium CE Through the overlapping frameworks of religion ritual and gender Martha Rampton connects early Christian reckonings with pagan magic to later doctrines and dogmas Challenging established views on the role of women in ritual magic during this period Rampton provides a new narrative of the ways in which magic was embedded within the foundational assumptions of western European society informing how people understood the cosmos divinity and their own Christian faith As Rampton shows throughout the first Christian millennium magic was thought to play a natural role within the functioning of the universe and existed within a rational cosmos hierarchically arranged according to a great chain of being Trafficking with the demons of the lower air was the essence of magic Interactions with those demons occurred both in highly formalistic ritual settings and on a routine and casual basis Rampton tracks the competition between pagan magic and

Christian belief from the first century CE when it was fiercest through the early Middle Ages as atavistic forms of magic mutated and found sanctuary in the daily habits of the converted peoples and new paganisms entered Europe with their own forms of magic By the year 1000 she concludes many forms of magic had been tamed and were by the reckoning of the elite essentially ineffective as were the women who practiced it and the rituals that attended it *Politics and Society in the Developing World* Mehran Kamrava, 2012-10-12 This book is a welcome new edition which completely updates and revises the very popular first edition *Politics and Society in the Third World* Mehran Kamrava has brought the book in line with the major changes in global politics and the politics and social issues of the developing world The book examines key issues such as democratisation civil society organisations and NGOs political society state collapse democratic bargains and transition consolidation and problems of legitimacy elections multi party politics industrial development dependency theory and globalisation the roles of the IMF and the World Bank the GATT and other multinational institutions urbanisation social change the increasing influence of western values capital and institutions urbanisation social change the increasing influence of western values capital and institutions political culture its role and impact in newly democratic developing countries revolution and gives more examples from Africa East Asia and rural societies *The Black Athlete in West Virginia* Bob Barnett, Dana Brooks, Ronald Althouse, 2020-04-02 This chronicle of sports at West Virginia's 40 black high schools and three black colleges illuminates many issues in race relations and the struggle for social justice within the state and nation Despite having inadequate resources the black schools sports teams thrived during segregation and helped tie the state's scattered black communities together West Virginia hosted the nation's first state wide black high school basketball tournament which flourished for 33 years and both Bluefield State and West Virginia State won athletic championships in the prestigious Colored Intercollegiate Athletic Association now Central Intercollegiate Athletic Association Black schools were gradually closed after the 1954 Brown v Board of Education decision and the desegregation of schools in West Virginia was an important step toward equality For black athletes and their communities the path to inclusion came with many costs *The Gendered West* Gordon Morris Bakken, Brenda Farrington, 2013-09-13 First Published in 2001 This anthology of western history articles emphasizes the New Western History that emerged in the 1980s and adds to it a heavy dose of legal history a field frequently ignored or misunderstood by the New Western historians From first contact American Indians knew that Europeans did not understand the gendered nature of America Confusion regarding the role of women within tribes and bands continued from first contact well into the late nineteenth century The journal articles that follow give readers a true sense of the gendered West Racial and ethnic heritage played a role in female experience whether Hispanic Japanese or Irish Women's work was part western history but women did not confine themselves to plow handles or brothels Women were very much a part of most occupations or in the process of breaking down barriers of access They worked in the fields for wages as well as for family welfare and prosperity Women demanded access to the professions whether teaching or law accounting or

medicine The process of eliminating barriers varied in time and space but the struggle was constant Yet the story of women in polygamous Utah or Idaho was different and an integral part of the fabric of western history Because of their beliefs and practices these women suffered at the hands of the federal government and persevered
