Social Comprehension and Judgment Robert S. Wyer, Jr., 2003-09-12 Written by one of the foremost authorities in social cognition *Social Comprehension and Judgment* examines how people process information encountered in their everyday lives In the book Dr Wyer proposes a new theory about the way in which information acquired in everyday life is comprehended and represented in memory and how it is later used as a basis for judgments and decisions A major emphasis throughout is on the construction and use of narrative representations of knowledge and the way that visual images influence the comprehension of these narratives and the judgments based on them The role of affective reactions in this cognitive activity is also discussed *Social Comprehension and Judgment* is divided into three sections Part I provides a conceptual overview by outlining the general theoretical framework focusing on assumptions about the storage and retrieval of information and reviews recent research on the impact of knowledge accessibility on judgments and decisions Part II deals with the comprehension of information and examines the role of these processes in impression formation persuasion and responses to humor Part III describes the inferences that are based on information conveyed in social situations This book is ideal for advanced students and researchers interested in the areas of social cognition or social information processing *Social Comprehension and Judgment* Robert Selden Wyer, 2004 **Social comprehension and judgment : the role of situation models, narratives, and implicit theories** [Anonymus AC07881937], 2004 **Social Psychology, Second Edition** Arie W. Individuals to Groups Steven J. Stroessner, Jeffrey W. Sherman, 2015-02-11 This volume focuses on social perception the processing of information about people This issue has always been central to social psychology but this book brings together literatures that in large part have been separated by the nature of the social target that is involved Historically research on person perception developed quite independently from research involving perceptions of groups Whereas the former research generally focused on the cognitive processes involved in forming impressions of individuals research on group perception examined the content of stereotypes and the conditions under which they are used in social judgment There was been little overlap in the theories and methods of these subfields and different researchers were central in each The chapters in this book highlight research and theorizing about social perception exploring the processes involved in social perception from persons to groups Some chapters describe work that was originally developed in person perception but is being extended to understanding groups Other chapters illustrate how some processes studied in the domain of stereotyping also affect perceptions of individual persons Finally other chapters focus on variables that affect perceptions and judgments of both individuals and groups providing opportunities for greater recognition of the common set of factors that are central to all types of social perception This groundbreaking book highlights the research contributions of David L Hamilton whose research has played a central role in uniting these previously independent areas of research It provides essential reading for upper level courses on social cognition or social perception and could also serve as an auxiliary text in courses on interpersonal perception relations and courses on stereotyping intergroup relations **Digital Video Advertising**

Arguing for a General Framework for Mass Media Scholarship W. James Potter, 2008-12-11. Arguing for a General Framework for Mass Media Scholarship challenges scholars and students to consider and reconsider what we know about media and how we think about media. As such, the book provides an important framework for thinking about knowledge regardless of the discipline. The text provides all of the necessary tools to move the field forward in a way that will increase the rigor of the work being done and augment the overall profile of the discipline. Dana Mastro, University of Arizona. In this groundbreaking book, W. James Potter presents an innovative perspective to media scholars and students who are frustrated with the fragmentation of research findings across so many journals, books, and fields. Arguing for a General Framework for Mass Media Scholarship presents a clear plan for a more efficient way to build knowledge about the mass media so that it can be better organized and made more useful. Key Features: Conducts an in-depth analysis of mass media scholarship's four major facets: effects, content, audiences, and organizations. Presents a significant shift in conceptualizing media effects and ways research can be conducted to generate more useful knowledge about media influence. Develops narrative line as a tool to guide analyses about how content decisions are made by producers. Synthesizes a system of explanation about why audiences attend to certain messages and how individuals construct meaning from those messages. Incorporates an analysis of mass media organizations to provide greater context of understanding messages and their effects on individuals and macro units in society. The book will play an important role in providing structure to a broad, fragmented discipline. I believe it will, at the very least, create important dialogues about what we now know, understand about areas of mass media, and where we should move as a discipline. This book is clearly a call to arms for mass media scholars to ratchet up the quality of research and what we know to see the interconnections within and among strands of scholarship and to

move forward in a more efficient organized manner Professor Potter should be commended for this Roger Cooper Ohio University This book is that call to action that comes forward every few years to wake us up and challenge our ways of doing things not by being radical but via synthesis I ve been waiting for several years for a book like this Sahara Byrne Cornell University
