Over centuries, profits from its growth and sales funded wars and fueled colonization, and its cultivation brought about massive changes in land use, labor systems, market practices, and social hierarchies, the effects of which are with us even today. *A Thirst for Empire* takes a vast and in-depth historical look at how men and women, through the tea industry in Europe, Asia, North America, and Africa, transformed global tastes and habits and in the process created our modern consumer society. As Erika Rappaport shows, between the

seventeenth and twentieth centuries the boundaries of the tea industry and the British Empire overlapped but were never identical and she highlights the economic political and cultural forces that enabled the British Empire to dominate but never entirely control the worldwide production trade and consumption of tea Rappaport delves into how Europeans adopted appropriated and altered Chinese tea culture to build a widespread demand for tea in Britain and other global markets and a plantation based economy in South Asia and Africa Tea was among the earliest colonial industries in which merchants planters promoters and retailers used imperial resources to pay for global advertising and political lobbying The commercial model that tea inspired still exists and is vital for understanding how politics and publicity influence the international economy Jacket
