old and new essays exploring the author's unique contributions to the sociology of science, mathematics, logic, robotics, brain and god. Known for his defense of a strong social constructionist approach to the hard problems in the sociology of science, the power and range of Restivo's interests and studies are discussed in this unique text. The essays range from his introduction of the sociology of objectivity early in his career to his recent construction of a social brain paradigm. The author situates himself in the context of the leading paradigms in science studies and his relationships with leading figures in the field, including Latour, Woolgar, Needham, and D. T. Campbell. The book demonstrates a general theoretical focus on the rejection of transcendence. He rejects Platonism in mathematics and socially situates consciousness, genius, and God. The author's wide-ranging interdisciplinary competencies reflect classical and postmodern influences and will be an invaluable reference for researchers working in this field.

The Treachery of Realities Sal Restivo, 2025-03-31. This volume targets the contemporary atmosphere of lies, post-truths, and alternative facts. Previously, we had no reason to think humanity was about to have its dinosaur moment; we could be confident of surviving for millennia. It now seems that humanity's future might be a matter of decades, given the variety of existential threats we face from climate change and asteroids to robots and AI. We are not going to save ourselves driven by faith, belief, hopes, prayers, and wishes in an atmosphere of science deniers. What is required is an investment in a renewed and re-energized secular worldview guided by the sociological imagination and opposed to conventional reasoning and action.
