Buerger, 1984     **Cultural Politics at the Fin de Siècle** Sally Ledger, Scott McCracken, 1995-02-02 Cultural Politics at the Fin de Siècle scrutinises ways in which current conflicts of race class and gender have their origins in the cultural politics of the last fin de siècle whose influence stretched from the 1890s when economic depression signalled the end of Britain's role as the workshop of the world to 1914 when world war accelerated imperial decline This collaborative venture by new and established scholars includes discussion of the New Woman the reconstruction of masculinities and of feminism and empire The imperialist theme is pursued in essays on Yeats and Ireland Gilbert and Sullivan and the figure of the vampire The rise of socialism and psychoanalysis and the relationship between nascent modernism and late twentieth century postmodernism are also addressed in this radical account     **Seizing the Light** Robert Hirsch, 2017-04-07 The definitive history of photography book *Seizing the Light* A Social Aesthetic History of Photography delivers the fascinating story of how photography as an art form came into being and its continued development maturity and transformation Covering the major events practitioners works and social effects of photographic practice Robert Hirsch provides a concise and discerning chronological account of Western photography This fundamental starting place shows the diversity of makers inventors issues and applications exploring the artistic critical and social aspects of the creative process The third edition includes up to date information about contemporary photographers like Cindy Sherman and Yang Yongliang and comprehensive coverage of the digital revolution including the rise of mobile photography the citizen as journalist and the role of social media Highly illustrated with full color images and contributions from hundreds of artists around the world *Seizing the Light* serves as a gateway to the history of photography Written in an accessible style it is perfect for students newly engaging with the practice of photography and for experienced photographers wanting to contextualize their own work     *Women's Camera Work* Judith Fryer Davidov, 1998 Gertrude Kasebier Imogen

Foster,Manfred Heiting,Rachel Stuhlman,George Eastman House,2007 Edited by Manfred Heiting Sheila J Foster Rachel Stuhlman Texts by Sheila J Foster Rachel Stuhlman Saskia Asse Denise Bethel Julian Cox Ellen Handy Steven Joseph Mark Osterman Pamela Roberts Grant Romer Larry Scahaaf Linsey Stewart *The Oxford History of Western Art* Martin Kemp,2000 The Oxford History of Western Art is the new authority on the development of visual culture in the West over the last 2700 years from the classical period to the end of the twentieth century OHWA is an innovative and challenging reappraisal of how the history of art can be presented and understood None of the currently available general histories of art offers the wealth of perspectives and cross media references of this book Through a carefully devised modular structure readersare given insights not only into how and why works of art were created but also how works in different media relate to each other across time Here uniquely is not the simple linear story of art but a rich series of stories told from varying viewpoints The founding principle of the book has been to use carefully selected groupings of pictures to give readers a sense of the visual texture of the various periods and episodes covered The 167 illustration groups supported by explanatory text and picture captions create a sequence of visual tours not merely a procession of individually great works viewed in isolation but juxtapositions of significant images that powerfully convey a sense of the visual environments in which works of art need

to be viewed in order to be understood and appreciated The aim throughout has been to make the shape and nature of these visual presentations a stimulating and rewarding experience allowing readers to become active participants in the process of interpretation and synthesis Another key feature of the narrative is the re definition of traditional period boundaries Rather than relying on conventional labels such as Medieval Renaissance Baroque etc five major phases of significant historical change are established that unlock longer and more meaningful continuities The art of classical antiquity from c 600 BC to the fall of Rome in AD 410 The establishment of visual culture in Europe from 410 to 1527 the sack of papal Rome European visual regimes from 1527 to 1770 The era of revolutions 1770 to 1914 Modernism and after 1914 to 2000 This new framework shows how the major religious and secular functions of art have been forged sustained transformed revived and revolutionized over the ages how the institutions of Church and State have consistently aspired to make art in their own image and how the rise of art history itself has come to provide the dominant conceptual framework within which artists create patrons patronize collectors collect galleries exhibit dealers deal and art historians write The text has been written by a team of 50 specialist authors working under the direction of Professor Martin Kemp one of the UK's most distinguished art historians Whilst bringing their own expertise and vision to their sections each author was also asked to relate their text to a number of unifying themes and issues including written evidence physical contexts patronage viewing and reception techniques gender and racial issues centres and peripheries media and condition the notion of art and current presentations Though the coverage of topics focuses on European notions of art and their transplantation and transformation in North America space is also given to cross fertilizations with other traditions including the art of Latin America the Soviet Union India Africa and Afro Caribbean Australia and Canada Professor Kemp and his team similarly deal generously with the applied arts and reproductive media such as photography and prints The result is a vibrant vigorous and revolutionary account of Western art serving both as an inspirational introduction for the general reader and an authoritative source of reference and guidance for students
