The best start in life? Great Britain: Parliament: House of Commons: Work and Pensions Committee, 2008-03-10 The Government has set itself the challenging target of halving the number of children living in poverty by 2010 11 and eradicating child poverty by 2020 With 2010 fast approaching Ministers are still committed to the targets and the Committee wanted to ascertain whether DWP has the right measures in place to meet its objectives Significant progress has been made but the target remains challenging there are still 2.8 million children living in poverty and the most recent data shows a slight increase in this number The Committee is convinced of the damaging effect of poverty on a child's self esteem and expectations and also its effects in contributing to social exclusion Children growing up in poverty are also more likely to have poorer health and poorer educational outcomes There are groups of children who have a much higher risk of growing up in poverty for example if they or a parent are disabled and there are higher poverty rates amongst Pakistani Bangladeshi and black children Getting parents into sustainable work should be the focus of the strategy to lift them and their children out of poverty but there are concerns that the Jobseekers Allowance regime is not sufficiently flexible to reflect the

complexity of lone parents lives To eradicate child poverty by 2020 the Government needs a long term strategy on benefit income for those who are unable to work If benefits are uprated in line with inflation the gap between the incomes of those in work and those on benefits will only get wider as benefits will not keep pace with earnings As poverty is measured as a percentage of median earnings the implications for the 2020 target in particular are serious *Poor Women, Poor Children* Harrell R. Rodgers,1996 In this new edition of his acclaimed study of American poverty Harrell Rodgers carefully analyzes the most recent data on the profile of poor families and the underlying causes of the dramatic increase in chronically poor mother only households After evaluating the record of past anti poverty efforts Rodgers examines the many new and proposed approaches to welfare reform their prospects of success and the consequences of failure both for the children of poverty and for a nation that leaves such a high proportion of its citizenry its future at risk **Trends in the Well-being of America's Children and Youth** , *Studies in Public Welfare* James R. Byrt,2024-02-12 Taking a novel approach to child support policy analysis Single Parents and Child Support Systems locates the transfer of payments between separated parents within a wider social policy ecosystem and compares the political institutional and administrative dimensions of child support policy enactment across the globe **At the Mercy of Externals** David L. Roberts BA MS MS Ph.D.,2012-05-24 Protecting children from all forms of abuse and understanding their formative years is on the minds of todays professionals and families In At the Mercy of Externals author Dr David L Roberts provides a practical model to successfully guide kids into adulthood He introduces his Roberts FLAGS model or RFLAGS which explains how we tend to act out emotion based anxiety rather than face the issues from the past that are often fueling our negative emotions of Fear Loneliness Anger Guilt and Shame The model serves as a visual and intellectual way to understand the development of maladaptive behavior and it is a means of helping us to understand that behavior is not necessarily representative of who we are as a person A companion to Psyche Soul ology At the Mercy of Externals advocates a two step approach to the problems families kids and professionals face in various situations and contexts Roberts uses examples from his dysfunctional childhood combined with his professional experiences helping at risk youth to demonstrate the importance of repairing our lives as adults as a preliminary step to nurturing and protecting children **Child Development: An Active Learning Approach** Laura E. Levine,Joyce Munsch,2010-09-16 Although the field of child and adolescent development seems to be an easy one in which to provide active learning opportunities to students few textbooks currently exist that actually do this American Families ,1990 **Growing Up with a Single Parent** Sara McLanahan,Gary D. Sandefur,2009-07-01 Nonwhite and white rich and poor born to an unwed mother or weathering divorce over half of all children in the current generation will live in a single parent family and these children simply will not fare as well as their peers who live with both parents This is the clear and urgent message of this powerful book Based on four national surveys and drawing on more than a decade of research Growing Up with a Single Parent sharply demonstrates the connection between family structure and a child s prospects for success What are the chances that the child of a single parent will graduate from high school go on to college find and keep a job Will she become a teenage mother Will he be out of school and out of work These are the questions the authors pursue across the spectrum of race gender and class Children whose parents live apart the authors find are twice as likely to drop out of high school as those in two parent families one and a half times as likely to be idle in young adulthood twice as likely to become single parents themselves This study shows how divorce particularly an attendant drop in income parental involvement and access to community resources diminishes children s chances for well being The authors provide answers to other practical questions that many single parents may ask Does the gender of the child or the custodial parent affect these outcomes Does having a stepparent a grandmother or a nonmarital partner in the household help or hurt Do children who stay in the same community after divorce fare better Their data reveal that some of the advantages often associated with being white are really a function of family structure and that

some of the advantages associated with having educated parents evaporate when those parents separate In a concluding chapter McLanahan and Sandefur offer clear recommendations for rethinking our current policies Single parents are here to stay and their worsening situation is tearing at the fabric of our society It is imperative the authors show that we shift more of the costs of raising children from mothers to fathers and from parents to society at large Likewise we must develop universal assistance programs that benefit low income two parent families as well as single mothers Startling in its findings and trenchant in its analysis Growing Up with a Single Parent will serve to inform both the personal decisions and governmental policies that affect our children s and our nation s future **Family Economics Review** ,1973 Violence and Abuse in American Families United States.
