abuse Arthur Artemis never had to confront an uncontrollable monster until his beloved sister was murdered by her husband

of the Cold War the Soviet Union launched Sputnik I the first artificial earth satellite For the West and especially the United  
States it was a shattering blow to national morale and pride It led to a deep seated fear that the Soviet Union would surpass  
the United States in both technology and power and that even nuclear war might be near After Sputnik shows that the late  
1950s were not an era of complacency and smugness but were some of the most anxious years in American history The Cold  
War was by no means a time of peace It was an era of a different kind of battle one that took place in negotiations and in the  
internal affairs of many countries but not always on the battlefield While many choose to remember President Eisenhower as  
a near pacifist his actions in Lebanon the Taiwan Straits crisis Berlin and elsewhere proved otherwise Seconded by his able  
secretary of state John Foster Dulles he steered America through some of the most difficult parts of the Cold War not always  
succeeding but preventing disaster The Middle East and Berlin crises the Indonesian Civil War Fidel Castro's rise to power  
and other events are all bluntly discussed in the light of Western and other illusions and delusions In this engaging history  
Alan J Levine delves deeply into this often misrepresented period of history and provides new insight into one of the most

formative decades in American history
