## **The Last Landscape:**

*The Last Landscape* William H. Whyte, 2012-10-23 The remaining corner of an old farm unclaimed by developers The brook squeezed between housing plans Abandoned railroad lines The stand of woods along an expanded highway These are the outposts of what was once a larger pattern of forests and farms the last landscape According to William H Whyte the place to work out the problems of our metropolitan areas is within those areas not outside them The age of unchecked expansion without consequence is over but where there is waste and neglect there is opportunity Our cities and suburbs are not jammed they just look that way There are in fact plenty of ways to use this existing space to the benefit of the community and *The Last Landscape* provides a practical and timeless framework for making informed decisions about its use Called the best study available on the problems of open space by the New York Times when it first appeared in 1968 *The Last Landscape* introduced many cornerstone ideas for land conservation urging all of us to make better use of the land that has survived amid suburban sprawl Whyte's pioneering work on easements led to the passage of major open space statutes in many states and his argument for using and linking green spaces however small the areas may be is a recommendation that has more currency today than ever before ***The Last Landscape [by] William H. Whyte [Anchor Books Ed.].*** William H. Whyte (Jr.),

*The Bulldozer in the Countryside* Adam Rome, 2001-04-23 The concern today about suburban sprawl is not new In the decades after World War II the spread of tract house construction changed the nature of millions of acres of land and a variety of Americans began to protest against the environmental costs of suburban development By the mid 1960s indeed many of the critics were attempting to institutionalize an urban land ethic *The Bulldozer in the Countryside* was the first scholarly work to analyze the successes and failures of the varied efforts to address the environmental consequences of suburban growth from 1945 to 1970 For scholars and students of American history the book offers a compelling insight into two of the great stories of modern times the mass migration to the suburbs and the rise of the environmental movement The book also offers a valuable historical perspective for participants in contemporary debates about the alternatives to sprawl

*The Apollonian Clockwork* Louis Andriessen, Elmer Schönberger, 2006 The one book about Stravinsky Stravinsky would have liked Richard Taruskin *The Changing Landscape of a Utopia* Shmuel Burmil, Ruth Enis, 2011 This book appears on the 100 year celebration of the kibbutz movement a century since the establishment of the first kibbutz Deganya Alef in 1910 The kibbutz started as a farming community and over the years has defined and developed its unique ideology of social and economic aspects of self rule equality mutual responsibility and common ownership of the means of production The kibbutz that some define as an utopian community has gradually developed into a community with diverse means of production including leading international industries The book describes the development of the unique system of zoning with landscape and gardens that strongly reflect the ideology This uniqueness was developed while rooted in the Western international tradition of landscape architecture with planners and designers educated mainly in central Europe The book describes the

different periods and styles in the development of the kibbutz landscape as well as some of the main landscape issues and elements such as the dominant tree species and the circle. It also describes in detail some of the key people involved in the development of the kibbutz landscape and gardens landscape gardeners landscape architects and kibbutz gardeners. The dramatic political and economic changes that occurred in Israel have not bypassed the kibbutz for they caused changes in kibbutz ideology and the community's social and economic structures. These changes and the changes that they have caused and are still causing in the kibbutz landscape are carefully detailed in the last chapter. The dramatic changes in the kibbutz landscape have also led to a discussion of the need for landscape conservation as well and some examples are described.

**The Assessment of German Cultural Landscapes** Jessica Matloch, 2018-03-09 Jessica Matloch examines the importance of regional cultural landscape for their residents using the approach of willingness to pay. She identifies that almost each resident of every region prefers water landscapes. Furthermore, landscape perception is often influenced by education and by the resident's relationship with nature. The impact of the relationship to the region differs between regions and resident groups. Regarding the involvement in or for the landscape, the results suggest that specific groups of residents are more willing to volunteer in and for regional landscapes than others. The analyses illustrate that the region is used the most to relax and the least for cultural purposes. **CRM**, 2006 *The Cultured Landscape* Sheila Harvey, Ken Fieldhouse, 2005 A team of eminent practitioners and writers contribute to an assessment of the philosophy of landscape and collectively form a new approach to creative design. Cultivating Continuity of the European Landscape Mauro Agnoletti, Saša Dobričić, Tessa Matteini, Juan Manuel Palerm, 2024-03-01 This edited volume reviews 20 years worth of research under the European Landscape Convention. The authors from the research network UNISCAPE offer readers insights into their combined efforts to carry out and support the goals of a sustainable European landscape 20 years after defining these original goals. The editors make landscape ecology and management a cornerstone for the debate on a 21st century Europe. The numerous contributions cover the three major areas of Landscape Policy and Governance, Landscape Design and Time, and Observing Landscape. The pan-European approach highlights the strength of international collaboration and interdisciplinary thinking. This book offers the collected knowledge as a working tool for researchers, scholars, and professionals in landscape ecology. *The Cultural Landscape & Heritage Paradox* Tom Bloemers, Henk Kars, Arnold Van der Valk, 2010 The basic problem is to what extent we can know past and mainly invisible landscapes and how we can use this still hidden knowledge for actual sustainable management of landscape's cultural and historical values. It has also been acknowledged that heritage management is increasingly about the management of future change rather than simply protection. This presents us with a paradox: to preserve our historic environment we have to collaborate with those who wish to transform it and in order to apply our expert knowledge we have to make it suitable for policy and society. The answer presented by the Protection and Development of the Dutch Archaeological Historical Landscape programme pdl bbo is an

integrative landscape approach which applies inter and transdisciplinarity establishing links between archaeological historical heritage and planning and between research and policy

**Submerged Landscapes of the European Continental Shelf** Nicholas C. Flemming, Jan Harff, Delminda Moura, Anthony Burgess, Geoffrey N. Bailey, 2017-08-07

Quaternary Paleoenvironments examines the drowned landscapes exposed as extensive and attractive territory for prehistoric human settlement during the Ice Ages of the Pleistocene when sea levels dropped to 120m 135m below their current levels This volume provides an overview of the geological geomorphological climatic and sea level history of the European continental shelf as a whole as well as a series of detailed regional reviews for each of the major sea basins The nature and variable attractions of the landscapes and resources available for human exploitation are examined as are the conditions under which archaeological sites and landscape features are likely to have been preserved destroyed or buried by sediment during sea level rise The authors also discuss the extent to which we can predict where to look for drowned landscapes with the greatest chance of success with frequent reference to examples of preserved prehistoric sites in different submerged environments Quaternary Paleoenvironments will be of interest to archaeologists geologists marine scientists palaeoanthropologists cultural heritage managers geographers and all those with an interest in the drowned landscapes of the continental shelf

**The Long-Term Perspective of Human Impact on Landscape for Environmental Change and Sustainability** Anna Maria Mercuri, Assunta Florenzano, 2019-11-19

The research studies included in this Special Issue highlight the fundamental contribution of the knowledge of environmental history to conscious and efficient environment conservation and management The long term perspective of the dynamics that govern the human climate ecosystem is becoming one of the main focuses of interest in biological and earth system sciences Multidisciplinary bio geo archaeo investigations into the underlying processes of human impact on the landscape are crucial to envisage possible future scenarios of biosphere responses to global warming and biodiversity losses This Special Issue seeks to engage an interdisciplinary dialog on the dynamic interactions between nature and society focusing on long term environmental data as an essential tool for better informed landscape management decisions to achieve an equilibrium between conservation and sustainable resource exploitation

**Landscapes and Landforms of Western Canada** Olav Slaymaker, 2016-12-01

This is the only book to focus on the geomorphological landscapes of Canada West It outlines the little appreciated diversity of Canada's landscapes and the nature of the geomorphological landscape which deserves wider publicity Three of the most important geomorphological facts related to Canada are that 90% of its total area emerged from ice sheet cover relatively recently from a geological perspective permafrost underlies 50% of its landmass and the country enjoys the benefits of having three oceans as its borders the Arctic Pacific and Atlantic oceans Canada West is a land of extreme contrasts from the rugged Cordillera to the wide open spaces of the Prairies from the humid west coast forests to the semi desert in the interior of British Columbia and from the vast Mackenzie river system of the north to small steep cascading streams on Vancouver Island

The thickest Canadian permafrost is found in the Yukon and extensive areas of the Cordillera are underlain by sporadic permafrost side by side with the never glaciated plateaus of the Yukon One of the curiosities of Canada West is the presence of volcanic landforms extruded through the ice cover of the late Pleistocene and Holocene epochs which have also left a strong imprint on the landscape The Mackenzie and Fraser deltas provide the contrast of large river deltas debouching respectively into the Arctic and Pacific oceans

**Landscapes and Landforms of Italy** Mauro Soldati, Mauro Marchetti, 2017-05-23 The book deals with the most striking landscapes and landforms of Italy Attention is given to landform diversity and landscape evolution through time which has been controlled by very diverse geological conditions and dramatic climate changes that have characterized the Italian peninsula and islands since the end of the last glaciation In addition various examples of human impact on the landscape are presented Landscapes and Landforms of Italy contains more than thirty case studies of a multitude of Italian geographical landmarks The topics and sites described in this book range from the Alpine glaciers to the Etna and Vesuvius volcanoes taking into account the most representative fluvial coastal gravity induced karst and structural landscapes of the country Chapters on the geomorphological landmarks of the cities of Rome and Venice are also included The book provides the readers with the opportunity to explore the variety of Italian landscapes and landforms through informative texts illustrated with several color maps and photos This book will be relevant to scientists scholars and any readers interested in geology physical geography geomorphology landscape tourism geoheritage and environmental protection

**MetroGreen** Donna Erickson, 2012-09-26 In metropolitan areas across the country you can hear the laments over the loss of green space to new subdivisions and strip malls But some city residents have taken unprecedented measures to protect their open land and a growing movement seeks not only to preserve these lands but to link them in green corridors Many land use and urban planning professionals along with landscape architects and environmental advocates have joined in efforts to preserve natural areas MetroGreen answers their call for a deeper exploration of the latest thinking and newest practices in this growing conservation field In ten case studies of U S and Canadian cities paired for comparative analysis Toronto and Chicago Calgary and Denver and Vancouver and Portland among them Erickson looks closely at the motivations and objectives for connecting open spaces across metropolitan areas She documents how open space networks have been successfully created and protected while also highlighting the critical human and ecological benefits of connectivity MetroGreen s unique focus on several cities rather than a single urban area offers a perspective on the political economic cultural and environmental conditions that affect open space planning and the outcomes of its implementation

**Contemporary Urban Landscapes of the Middle East** Mohammad Gharipour, 2016-03-17 The Middle East is well known for its historic gardens that have developed over more than two millenniums The role of urban landscape projects in Middle Eastern cities has grown in prominence with a gradual shift in emphasis from gardens for the private sphere to an increasingly public function The contemporary landscape projects either designed as public plazas or public parks have played a significant role in transferring the modern Middle Eastern cities to a new era and also in transforming to a newly shaped social culture in which the public has a voice This book considers what ties these projects to their historical context and what regional and local elements and concepts have been used in their design *The Impact of the Roman Empire on Landscapes* , 2021-11-15 This volume presents the results of the fourteenth workshop of the international network Impact of

Empire It focuses on the ways in which Rome's dominance influenced changed and created landscapes and examines in which ways Roman landscapes were narrated and semantically represented To assess the impact of Rome on landscapes some of the twenty contributions in this volume analyse functions and implications of newly created infrastructure Others focus on the consequences of colonisation processes settlement structures regional divisions and legal qualifications of land Lastly some contributions consider written and pictorial representations and their effects In doing so the volume offers new insights into the notion of Roman landscapes and examines their significance for the functioning of the Roman empire

**The Resilience of Cultural Landscapes** Fabrizio Aimar, 2024-04-23 This book explores the possibility of building the resilience of the UNESCO cultural landscapes both using theoretical conceptions and practical strategies and actions Two case studies have been selected one in Italy and one in China which have then been explored for the first time in such a comparative way Different notions of landscape as well as the driving force of changes affecting these landscapes are examined and compared Moreover the perceptions of the local communities regarding these landscapes are examined using online questionnaires with over 400 participants This research highlights the need for an integrated management system building stronger rural communities able to manage change and continuity Five pillars to build the resilience of these landscapes have been provided with schemes and figures requiring a people centered approach in their management This book demonstrates strong connections between identity and landscape resilience especially in inland areas where the sense of identity is most prominent Furthermore it is structured to make it possible to replicate this investigation in ordinary case studies i.e. ordinary landscapes Scholars and professionals interested in cultural landscapes and heritage conservation are target of this book as well as site managers
