in India has been considered a signifying art Indian music creates and represents meanings of all kinds some of which extend outwardly to the cosmos while others arise inwardly in the refined feelings which a musical connoisseur experiences when listening to it In this book the author explores signification in Hindustani classical music along a two fold path Martineq first constructs a theory of musical semiotics based on the sign theories of Charles Sanders Peirce He then applies his theory to the analysis of various types of Hindustani music and how they generate significations The author engages such fundamental issues as sound quality raga tala and form while advancing his unique interpretations of well known semiotic phenomena like iconicity metalanguage indexicality symbolism Martinez s study also provides deep insight into semiotic issues of musical perception performance scholarship and composition An specially innovative and extensive section of the book analyzes representations in Hindustani music in terms of the Indian aesthetic theory of rasa The evolution of the rasa system as applied to musical structures is traced historically and analyzed semiotically In the light of Martinez s theories Hindustani music reveals itself to be both a delightfully sensuous and highly sophisticated system of acoustic representations The

modernity examining the relationship between the two cities sheds light on forms of continuity and transition over the nineteenth century as artists and their patrons navigated political ruptures and social transformations The Scattered Court challenges the existing historiography of Hindustani music and Indian culture under colonialism by arguing that our focus on Anglophone sources and modernizing impulses has directed us away from the aesthetic subtleties historical continuities and emotional dimensions of nineteenth century music
