Sid and the Very Hard to Find Squid James O'Hanlon, 2025-06-02 No one has ever seen a colossal squid in the wild but Sid is determined to be the first. Join Sid on his exciting quest to find this incredibly rare animal. Along the way Sid encounters other strange creatures until he eventually discovers that sometimes the joy of exploration is more about the unexpected journey and not the ending. Look closely and you might just find a cheeky colossal squid too. Reading level varies from child to child but we recommend this book for ages 5 to 9. Jonathan Cowie, 2013 The second edition of this acclaimed text has been fully updated and substantially expanded to include the considerable developments since publication of the first edition in our understanding of the science of climate change its impacts on biological and human systems and developments in climate policy. Written in an accessible style it provides a broad review of past present and likely future climate change from the viewpoints of biology ecology human ecology and Earth system science. It will again prove to be invaluable to a wide range of readers from students in the life sciences who need a brief overview of the basics of climate science to atmospheric science geography geoscience and environmental science students who need to understand the biological and human ecological implications of climate change. It is also a valuable reference text for those involved in environmental monitoring conservation and policy making. *Outlines of Physical Geography* George William Fitch, 1856 **Marine Biology: A Very Short Introduction** Philip V. Mladenov, 2013-09-26 The marine environment is the largest most important and yet most mysterious habitat on our planet. It contains more than 99% of the world's living space produces half of its oxygen plays a critical role in regulating its climate and supports a remarkably diverse and exquisitely adapted array of life forms from microscopic viruses bacteria and plankton to the largest existing animals. As the 21st century progresses human activities such as overfishing coastal development plastic pollution oil spills nutrient pollution the spread of exotic species and the emission of climate changing greenhouse gases are posing a significant threat to the marine environment and to many of its life forms. In this unique Very Short Introduction Philip Mladenov provides a comprehensive overview of marine biology providing a tour of marine life and marine processes that ranges from the polar oceans to tropical coral reefs and from the intertidal to the hydrothermal vents of the deep sea. ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area.
