Social Closure The Theory Of Monopolization And Exclusion:

Social Closure Raymond Murphy, 1988 The development and inequalities of society have traditionally been analysed in terms of stratification and class Raymond Murphy argues that important inequalities of power remain unanalysed by traditional social theories and that the concept of social closure suggested by Max Weber provides a means of capturing the common and essential features of types of subordination that appear quite different on the surface Seemingly unrelated forms of domination based on private property the bureaucratic Communist Party credentials status race language and gender are tied together by Weber's notion of social closure as the underlying principle of all systems of inequality in power The book suggests improvements to the conceptions of closure power and social class and turns closure theory back on itself to analyse the scholarly field It develops a conceptualization of the rules of social closure and their transformation and compares the Weberian concept of closure with the Marxian concept of exploitation Raymond Murphy examines the way in which Western society in the elusive pursuit of mastery and control has transformed its codes of social closure by the process of formal rationalization He shows how this formal rationalization of monopolization and exclusion has led to substantively irrational results Professor Murphy's conclusion that Weber's theories of social closure and rationalization provide a conceptual basis for going beyond a narrow focus on one particular means of monopolization to an analysis of monopolization and exclusion per se marks an important and original advance in the development of the ideas of Weber and in social theory generally

A Cultural History of Civil Examinations in Late Imperial China Benjamin A. Elman, 2000-03-22 A very important study of one of the most important institutions in Chinese history one without which the China we have today would certainly be a vastly different place Peter Bol author of *This Culture of Ours Intellectual Transitions in T'ang and Sung China*

Professions in Civil Society and the State David Sciulli, 2009 Professions are central to any political sociology of major associations organizations and venues in civil society underpinning democracy they are not a subset of livelihoods in a mundane sociology of work and occupations *Professions in Civil Society and the State* is at once elegant and startling in its directness and the sheer scope of its implications for future comparative research and theory Not since Talcott Parsons during the early 1970s has any sociologist or political scientist pursued this line of inquiry Sciulli's theoretical approach differs fundamentally from Parsons and rests on a breadth of historical and cross national support that always eluded him The sociology of professions has come full circle leaving behind Parsons his critics and two generations of received wisdom

European Lobbying Christian Lahusen,2023-02-16 Lobbying is an integral part of the political reality of the European Union and a highly competitive and dynamic field of interest groups This book takes a systematic look at lobbyists in order to

broaden our understanding of the staff entrusted with the responsibility of influencing European politics Who are the European lobbyists What are their professional backgrounds career patterns practices and beliefs The study uses a sociological framework to explore the professionalisation and professionalism of the field across national proveniences policy fields and interest groups and develops a systematic analysis that considers three different dimensions occupational patterns shared knowledge and common convictions Based on original research that combines in depth interviews with survey data European Lobbying demonstrates that European lobbying is a firmly established and highly professionalised m tier In an organisational field characterised by growth pluralisation and increasing competition the professional staff contributes to the homogenisation of European lobbying and the marginalisation of other non professionalised forms of interest representation It will therefore appeal to scholars and students of sociology and politics with interest in European studies European Union politics and the sociology of the professions The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

The Lost origins of Osteopathy and Chiropractic in European Mechanical Medicine and Physical Education, c. 1800-1950 Anders Ottosson, 2025-07-31 This book examines the global history of allegedly scientific mechanical cures commonly used to combat internal and chronic diseases and explores how and why the professional demarcation between orthodox and irregular medicine evolved Now globally dispersed the systems of osteopathy and chiropractic are considered as unique pieces of therapeutic Americana with no obvious inspirational counterpart found in the Old World It is their similar monocausal and biomedically strange etiologies that have given them this status namely that dislocations and subluxations of joints in the spine were the main source of disease At the end of the 19th century when osteopathy and chiropractic materialized in the USA this was a spectacular claim Notably the Germ theory had its breakthrough yet early osteopaths and chiropractors did not recognize it in favor of their dislocations and subluxations This book presents a new answer regarding what formed their etiologies Through a combination of many unutilized source materials with novel theoretical and methodical approaches the systems of osteopathy and chiropractic are traced back and related to a seminal yet overlooked 19th century European discourse of so called mechanical medicine which also permeated the USA Shedding new light on the professionalization and gendering of the modern healthcare system this volume will be of value to students and scholars alike interested in the history of science technology and medicine

World Yearbook of Education 2015 Agnès van Zanten, Stephen J. Ball, Brigitte Darchy-Koechlin, 2015-02-11 This latest volume in the World Yearbook of Education Series focuses on educational elites and inequality focusing particularly on the ways in which established and emergent groups located at the top of the social hierarchy and power structure reproduce establish or redefine their position The volume is organized around three main issues analyzing the way in which parents students and graduates in positions of social advantage use their assets and capitals in relation to educational strategies and how these are different for old and new and

cultural and economic elites studying how elite institutions have adapted their strategies to take into account changes in the social structure in policy and in their institutional environment and exploring the impact of these strategies on educational systems at the national and global levels mapping the new global dynamics in elite education and how new forms of international education and transnational cultural capital as well as new global educational elite pathways shape elite students identities status and trajectories Making use of a social and an institutional approach as well as a focus on practices and policies the volume draws on research conducted on secondary schools and on higher education In addition the global contributions within the book allow for a comparison and contrast of situations in different countries This results in a comprehensive picture of common processes and national differences concerning advantage and excellence and a thorough examination of the impact of globalization on the strategies identities and trajectories of elite groups and individuals alongside more general cultural and economic processes

Essays in Economic Sociology Max Weber, 2020-09-01

The writings of Max Weber 1864 1920 contain one of the most fascinating and sophisticated attempts ever made to create an economic sociology Economic sociologist and Weber scholar Richard Swedberg has selected the most important of Weber s enormous body of writings on the topic making these available for the first time in a single volume The central themes around which the anthology is organized are modern capitalism and its relationships to politics to law and to culture and religion a special section is devoted to theoretical aspects of economic sociology Swedberg provides a valuable introduction illuminating biographical and intellectual dimensions of Weber s work in economic sociology as well as a glossary defining key concepts in Weber s work in the field and a bibliographical guide to this corpus Weber s substantive views on economic sociology are represented in this volume through crucial excerpts from works such as his General Economic History and The Protestant Ethic and the Spirit of Capitalism but the reader can follow his attempt to construct a conceptual foundation for economic sociology in Economy and Society as well Also included is Weber s celebrated inaugural lecture The Freiburg Address along with a number of central but hitherto inaccessible writings Though written nearly a century ago Weber s work has the quality of a true classic and the reader will find many ideas in his writings on economic topics that remain applicable in today s world These include Weber s discussion of what is now called social capital his analysis of the institutions needed for a well functioning capitalist economy and his more general attempt to introduce social structure into economic analysis As this volume demonstrates what basically motivated Weber to work with economic sociology was a realization shared by many economists and sociologists today that the analysis of economic phenomena must include an understanding of the social

dimension Guided by volume editor Swedberg the reader of this anthology discovers the significance and the enduring relevance of Weber s contribution to economic sociology
