Culture and Cognition Bradley Franks, 2011-04-05 Human culture depends on human minds for its creation meaning and exchange But minds also depend on culture for their contents and processes Past resolutions to this circularity problem have tended to give too much weight to one side and too little weight to the other In this groundbreaking and timely work Bradley Franks demonstrates how a more plausible resolution to the circularity problem emerges from reframing mind and culture and their relations in evolutionary terms He proposes an alternative evolutionary approach that draws on views of mind as embodied and situated By grounding social construction in evolution evolution of mind is intrinsically connected to culture resolving the circularity problem In developing his theory Franks provides a balanced critical assessment of modularity based and social constructionist approaches to understanding mind and culture

Erneling, David M. Johnson, 2005-01-13 What holds together the various fields which considered together are supposed to constitute the general intellectual discipline that people now call cognitive science Some theorists identify the common subject matter as the mind but scientists have not been able to agree on any single satisfactory answer to the question of what the mind is This book argues that all cognitive sciences are not equal and that rather only neurophysiology and cultural psychology are suited to account for the mind s ontology **The Social Construction of Community Care** Anthea Symonds, Anne Kelly, 1998-11-11 This book represents a new development in the discussion of community care policies with its integrated approach addressed to both community nurses and social workers It includes contributions from practitioners in both fields as well as lecturers and researchers in sociology and social policy The overall theme of the book is the concept of community as a social and cultural construction The authors begin with an account of the historical construction of community care followed by explorations of the actual practice of the delivery of care and of the needs of particular groups within the community *Stevens' Handbook of Experimental Psychology and Cognitive Neuroscience, Developmental and Social Psychology*, 2018-02-01 IV Developmental self evaluation moral development emotion cognition interactions person perception memory implicit social cognition motivation group processes development of scientific thinking language acquisition development of mathematical reasoning emotion regulation emotional development development of theory of mind category and conceptual development attitudes executive function The Reality of Social Construction Dave Elder-Vass, 2012-04-23 Argues that versions of realist and social constructionist ways of thinking about the social world are compatible with each other *An Introduction to Social Constructionism* Vivien Burr, 2006-07-13 An invaluable clear guide to social constructionism for all perplexed students who want to begin to understand this difficult area Introduction to Social Constructionism is a readable and critical account of social constructionism for students new to the field Focusing on the challenge to psychology that social constructionism poses Vivien Burr examines the notion of personality to illustrate the rejection of essentialism by social constructionists This questions psychology s traditional understanding of the person She then shows how the study of language can be used as a focus for our understanding of human behaviour and experience This is continued by examining discourses and their role in constructing social phenomena and the relationship between discourse and power However the problems associated with these analyses are also clearly outlined Many people believe that one of the aims of social science should be to bring about social change Vivien Burr analyses what possibilities there might be for change in social constructionist accounts She also addresses what social constructionism means in practice to research in the social sciences

and includes some guidelines on doing discourse analysis
