The Key to Nuclear Restraint Thomas Jonter, 2016-05-11 Why have some nations acquired nuclear weapons while others have refrained from doing so Most research related to this question has focused on states that have built nuclear weapons yet little attention has been devoted to countries that have chosen nuclear restraint This book analyzes Swedish plans to acquire nuclear weapons during the Cold War Sweden was very close to putting a bomb together in 1960s but for a number of reasons illuminated in this book decision makers abandoned those plans and subsequently rose to become one of the most recognized players in the international game of disarmament Thanks to the recent declassification of essential documentation in Sweden and United States it is now possible to assemble a comprehensive analysis of the Swedish nuclear weapons program based on primary sources This book presents that analysis a unique perspective owing to the fact that nuclear development is a highly secretive activity in most countries with non existent or limited access to state archives

The introduction of the ban on swill feeding Great Britain: Parliamentary and Health Service Ombudsman, 2007-12-14 This report contains the results of the Ombudsman's investigation into the complaint made by Associated Swill Users ASU against the Department for Environment Food and Rural Affairs Defra in relation to the introduction of the ban on swill feeding following the outbreak of Foot and Mouth Disease FMD in 2001 ASU contended that the consultation had been fundamentally flawed and the results had been misrepresented there had been an inadequate rationale behind the decision to introduce the ban Defra had been unclear about the scope of the ban and its application swill farmers had been given very limited time for compliance and that Defra's refusal to award compensation to former swill feeders had been based on a failure to recognise the true impact of the ban on swill farmers ASU subsequently extended their complaint to include the contention that failures in the inspection regime at a swill farm in Heddon on the Wall had effectively allowed illegal feeding activities to go unchecked and thereby led to the outbreak of FMD The report concludes that the decision on compensation for swill users made by Ministers when considering the introduction of a ban in May 2001 was not taken in the full light of the facts and was maladministrative It also finds that the failure of the Defra inspector to follow proper procedures and to make and submit appropriate records in relation to animal welfare matters was also sufficiently serious as to constitute maladministration But the maladministration cannot be said to have resulted in an unremedied injustice to ASU members as ministers have revisited their decision on compensation in full light of the facts

Smith,2007-05-28 Party Influence in Congress challenges current arguments and evidence about the influence of political parties in the US Congress Steven S Smith argues that theory must reflect policy electoral and collective party goals These goals call for flexible party organizations and leadership strategies They demand that majority party leaders control the flow of legislation package legislation and time action to build winning majorities and attract public support work closely with a president of their party and influence the vote choices for legislators Smith observes that the circumstantial evidence of party influence is strong multiple collective goals remain active ingredients after parties are created party size is an important factor in party strategy both negative and positive forms of influence are important to congressional parties and the needle in the haystack search for direct influence continues to prove frustrating **Innovative Mobile and Internet Services in Ubiquitous Computing** Leonard Barolli,Aneta Poniszewska-Maranda,Hyunhee Park,2020-06-09 This book presents the latest research findings methods and development techniques challenges and solutions concerning UPC from both theoretical and practical perspectives with an emphasis on innovative mobile and Internet services With the proliferation of wireless technologies and electronic devices there is a rapidly growing interest in Ubiquitous and Pervasive Computing UPC which makes it possible to create a human oriented computing environment in which computer chips are embedded in everyday objects and interact with the physical world Through UPC people can go online even while moving around thus enjoying nearly permanent access to their preferred services Though it has the potential to revolutionize our lives UPC also poses a number of new research challenges *Norms, Logics and Information Systems* Paul

McNamara, Henry Prakken,1999 This book presents research in an interdisciplinary field resulting from the vigorous and fruitful cross pollination between traditional deontic logic and computer science AI researchers have used deontic logic as one of the tools in modelling legal reasoning Computer scientists have discovered that computer systems including their interaction with other computer systems and with human agents can often be productively modelled as norm governed So for example deontic logic has been applied by computer scientists for specifying bureaucratic systems access and security policies and soft design or integrity constraints and for modelling fault tolerance In turn computer scientists and AI researchers have also discovered and made it clear to the rest of us that various formal tools e g nonmonotonic temporal and dynamic logics developed in computer science and artificial intelligence have interesting applications to traditional issues in deontic logic This volume presents some of the best work done in this area with the selection at once reflecting the general interdisciplinary and international character that this area of research has taken on as well as reflecting the more specific recent inter disciplinary developments between traditional deontic logic and computer science Advertising of Tobacco
