Pirard**

The Kiribati Test:

Grappling with the Bomb Nic Maclellan, 2017-09-26 *Grappling with the Bomb* is a history of Britain's 1950s program to test the hydrogen bomb code name Operation Grapple. In 1957-58 nine atmospheric nuclear tests were held at Malden Island and Christmas Island today part of the Pacific nation of Kiribati. Nearly 14,000 troops travelled to the central Pacific for the UK nuclear testing program; many are still living with the health and environmental consequences. Based on archival research and interviews with nuclear survivors, *Grappling with the Bomb* presents the story of a Kiribati woman, Sui Kiritome, British pacifist Harold Steele, businessman James Burns, Fijian sailor Paul Ah Poy, English volunteers Mary and Billie Burgess, and many other witnesses to Britain's nuclear folly. *Equator* Thurston Clarke, 2014-09-09 Widely considered a jewel of contemporary travel literature, *Equator* is Thurston Clarke's magnificent witty account of his solo journey along the earth's torrid

midsection, a grueling twenty-five thousand mile odyssey that spanned three years and as many continents. His was a perilous trek across an almost surreal landscape where a first-class hotel appeared smack in the middle of a leper colony and a one-time Pacific island paradise stood as a hideous bomb-blasted testament to nuclear folly. Along the way, Clarke encountered the world's heaviest rat, the earth's highest volcano, and the king of a Micronesian island wearing flip-flops and a novelty T-shirt. Throughout, Clarke's unflagging sense of humor and wonder make *Equator* a classic of its kind. **The Ocean on Fire** Anaïs Maurer, 2024-03-01 Anaïs Maurer foregrounds Pacific literature as a key archive for surviving and thriving in an environment in which Indigenous inhabitants have been bombarded with the equivalent of one Hiroshima bomb a day for half a century.

Emerging Space Powers Brian Harvey, Henk H. F. Smid, Theo Pirard, 2011-01-30 This work introduces the important emerging space powers of the world. Brian Harvey describes the origins of the Japanese space program from rocket designs based on WW II German U-boats to tiny solid-fuel pencil rockets which led to the launch of the first Japanese satellite in 1970. The next two chapters relate how Japan expanded its space program, developing small satellites into astronomical observatories and sending missions to the Moon, Mars, comet Halley, and asteroids. Chapter 4 describes how India's Vikram Sarabhai developed a sounding rocket program in the 1960s. The following chapter describes the expansion of the Indian space program. Chapter 6 relates how the Indian space program is looking ahead to the success of the moon probe Chandrayaan due to launch in 2008 and its first manned launching in 2014. Chapters 7, 8, and 9 demonstrate how in Iran communications and remote sensing drive space technology. Chapter 10 outlines Brazil's road to space, begun in the mid-1960s with the launch of the Sonda sounding rockets. The following two chapters describe Brazil's satellites and space launch systems and plans for the future. Chapters 13 and 14 study Israel's space industry. The next chapters look at the burgeoning space programs of North and South Korea. The book ends by contrasting and comparing all the space programs and speculating how they may evolve in the future. An appendix lists all launches and launch attempts to date of the emerging space powers. *Nuclear Weapons* Stuart Casey-Maslen, 2021-11-04 A new nuclear arms race is underway between Russia

and the United States one that focuses on the technology of delivery of nuclear warheads This book describes how and why this race is happening who still possesses nuclear weapons and what constraints apply to those weapons under international law A global nuclear ban treaty entered into force in January 2021 but the nuclear powers kept distant The last remaining treaty restraining the arsenals of the two nuclear superpowers will expire in less than five years time and the risk is that other States will turn to nuclear arms for their defence further fracturing the non proliferation regime installed after the Cuban missile crisis

Nuclear Bodies Robert A. Jacobs, 2022-01-01 The Cold War reconsidered as a limited nuclear war A grimly important analysis of the cold war Andrew Robinson Nature Inexorable clarity and care for his fellow humans mark Robert Jacobs s guide to the Cold War as a limited nuclear war whose harms disfigure any possible future Norma Field author of *In the Realm of a Dying Emperor* Japan at Century s End In the fall of 1961 President Kennedy somberly warned Americans about deadly radioactive fallout clouds extending hundreds of miles from H bomb detonations yet he approved ninety six U S nuclear weapon tests for 1962 Cold War nuclear testing production and disasters like Chernobyl and Fukushima have exposed millions to dangerous radioactive particles these millions are the global hibakusha Many communities continue to be plagued with dire legacies and ongoing risks sickness and early mortality forced displacement uncertainty and anxiety dislocation from ancestors and traditional lifestyles and contamination of food sources and ecosystems Robert A Jacobs re envisions the history of the Cold War as a slow nuclear war fought on remote battlegrounds against populations powerless to prevent the contamination of their lands and bodies His comprehensive account necessitates a profound rethinking of the meaning costs and legacies of our embrace of nuclear weapons and technologies

Contextualizing the Pedagogy of English as an International Language Nugrahenny T. Zacharias, 2013-09-11 Among the growing number of publications on promoting English as an International Language EIL little has been written on the complexities that the EIL paradigm has brought to the teaching and learning of English in the classroom This edited book seeks to address this deficit in the literature by bringing together

narratives of the realities that EIL practitioners encountered in their diverse teaching contexts including Indonesia the Pacific islands USA and Australia the struggles tensions dilemmas and quests of living as EIL practitioners in specific teaching contexts and wider English communities in general are all explored in this book It explores pedagogical practices understandings and challenges surrounding the implementation of EIL pedagogy and principles in contexts where English is traditionally described as a second language or foreign language This book will be of interest to teachers academics and research students working in the areas of ELT critical applied linguistics EIL language and identity and English language teacher education It can also be used to complement university level textbooks in these areas The book provides theoretical and contextual knowledge for practicing teachers and teacher educators seeking to understand and explore the teaching and learning realities of implementing EIL in the classroom

The Last Colonies Robert Aldrich, John Connell, 1998-07-13 This comprehensive and authoritative book is about the last colonies those remaining territories formally dependent on metropolitan powers It discusses the surprisingly large number of these territories mainly small isolated islands with limited resources Yet these places are not as obscure as might be expected They may be major tourist destinations military bases satellite tracking stations tax havens or desolate underpopulated spots that can become international flashpoints such as the Falklands The authors find that at a time of escalating nationalism and globalization these remnants of empire provide insights into the meanings of political economic legal and cultural independence as well as sovereignty and nationhood This book provides a broad based and provocative discussion of colonialism and interdependence in the modern world from a unique perspective

International Perspectives on Democratization and Peace Narayanan Ganesan, 2020-10-26 This book examines the concept of peace and the relevance of historical and contextual factors that contribute to peaceful coexistence of people and dives into a deep examination of how democracy furthers peace especially in conflict prone countries Seven case studies illustrate the impact of democratization on transformation and prevention

Detect and Deter: Can Countries Verify the Nuclear Test Ban? Ola Dahlman, Jenifer Mackby, Svein Mykkeltveit, Hein Haak, 2011-09-03 How can countries verify compliance with the Comprehensive Nuclear Test Ban Treaty CTBT and detect and deter violations It is in their interest to increase their verification readiness because the assessment of compliance with the treaty rests with states parties to the CTBT The treaty provides countries with two verification elements an international system of monitoring stations and an on site inspection regime The monitoring system can detect nuclear explosions underground in the atmosphere and under water This book provides incentives to nations around the world on how they can organize their efforts to verify compliance with the CTBT and how they can collaborate with other countries perhaps on a regional basis to monitor areas of concern Such focused efforts can improve their detection and deterrence capabilities through precision monitoring The book addresses the CTBT verification from the perspective of countries It shows how they can create the essential tools for the assessment of the large amounts of data available from the verification regime and other sources

including observations from satellites and thousands of stations outside of the treaty regime Countries can also use current scientific and technological developments to assist them in verifying compliance with the treaty The book offers political and scientific analysis on the evolution of the treaty over the years The book is intended for professionals in the political diplomatic scientific and military fields who deal with international security non proliferation and arms control It is also intended for non governmental organizations and journalists seeking a better understanding of the nuclear test ban issue and how states can verify compliance with the treaty

Viral Hepatitis in Asia and the Pacific Jing Sun, Polin Chan, Yoke Ling Chee, 2025-03-25 Viral Hepatitis Elimination in Asia and the Pacific On the Path of Worldwide Treatment documents the narratives innovations and scope of work in the Asia Pacific region in starting consolidating and moving towards the elimination of viral hepatitis The Asia Pacific region is disproportionately affected by viral hepatitis accounting for two thirds of the global burden Countries from low middle and high income economies have adopted different strategies to address combating and eliminating viral hepatitis The successful experiences of the Asia Pacific region are valuable for other regions especially the middle and low income countries moving towards the achievement of the 2030 goal of elimination Strategies discussed include integrated approaches negotiating universal access to diagnostics and treatment options including vaccines Content further covers the critical barriers to achieve the 2030 targets for elimination of viral hepatitis and how to overcome them This is the perfect reference for all hepatology researchers and elimination policy advocates who are dedicated to joining the fight for the 2030 goal of the elimination of viral hepatitis as a public health threat Focuses on the elimination of viral hepatitis as a global target through learning strategies and approaches in countries where hepatitis is most common Provides the how behind the elimination of viral hepatitis including integrated approaches and shifts in science and policy Presents updated information from multiple countries on the challenges and strategies that can be used toward the WHO's goal of eliminating viral hepatitis

Spies in the Sky Pat Norris, 2008 In this book Patrick Norris responds to the 50th Anniversary of the dawn of the Space Age the launch of Sputnik 1 with a review of the most important historical applications of space science for the benefit of the human race during that half century focusing on the prevention of nuclear war In developing this story Norris illuminates a little known aspect of the Space Age namely the military dimension

Global Activism and Humanitarian Disarmament Matthew Breay Bolton, Sarah Njeri, Taylor Benjamin-Britton, 2019-10-31 This book analyses the politics of the humanitarian disarmament community a loose coalition of activist and advocacy groups humanitarian agencies and diplomats who have successfully achieved international treaties banning landmines cluster munitions and nuclear weapons as well as restricting the global arms trade Two campaigns have won Nobel Peace Prizes Disarmament has long been a dirty word in the international relations lexicon But the success of the humanitarian disarmament agenda shows that people often choose to prohibit or limit certain violent technologies for reasons of security honour ethics or humanitarianism This edited volume showcases interdisciplinary research by scholars

and practitioners seeking to understand the dynamics and impact of the new global activism on weapons While some raise concerns that humanitarian disarmament may be piecemeal and depoliticizing others see opportunities to breathe new life into moribund arms control policymaking Foreword by 1997 Nobel Peace Prize Laureate Jody Williams

Communications Regulation ,2004 *The Avro Shackleton* Jason Nicholas Moore,2023-09-17 Long ranged maritime reconnaissance aircraft were a part of British wartime strategy since the First World War in the form of flying boats During the Second World War the flying boats were increasingly replaced by land based aircraft such as the American Lend Lease Flying Fortresses and Liberators After the war these aircraft were replaced by a purpose built aircraft the Avro Shackleton which traced its ancestry through the Lincoln and Lancaster all the way back to the early Second World War bomber the Manchester The road from the Manchester to the Shackleton was a long one and it is described comprehensively The Shackleton itself went through two major changes from the MR 1 to the MR 2 then from the MR 2 to the MR 3 Along with a detailed technical description of the Shackleton and its weaponry photographs and accurate colour profiles accompany the text to illustrate the Shackleton This aircraft is compared and contrasted with its post war piston engined counterparts Its former use with the United Kingdom and South Africa is also described The current survivors especially an MR 2 WR963 in the United Kingdom and an AEW 2 WL790 in the United States are described in great detail **Ocean Thermal Energy**
