culture *The Kitchen* John Ota, 2020-02-25 One man's quest to seek out and be inspired by the great historic kitchens of Canada and the USA John Ota was a man on a mission to put together the perfect kitchen He and his wife had been making do with a room that was frankly no great advertisement for John's architectural expertise It just about did the job but for a room that's supposed to be the beating heart of a home and a joy to cook in the Ota's left a lot to be desired And so John set out on a quest across North America exploring examples of excellent designs throughout history to learn from them and apply their lessons to his own restoration Along the way he learned about the origins and evolution of the kitchen its architecture and its appliances He cooked with expert instruction And he learned too about the homes and their occupants who range from pilgrims to President Thomas Jefferson from turn of the century tenement dwellers to 21st century Vancouver idealists from Julia Child to Georgia O'Keeffe and from Elvis Presley to Louis Armstrong John Ota has a refreshingly upbeat approach and a hunger for knowledge and indeed for food His energy and enthusiasm are contagious and his insights of lasting value Illustrated throughout with photographs and also with drawings by the author this is a book for homeowners home makers interior designers cooks armchair historians and for anyone who like John Ota before them is looking for inspiration for a renovation

American Home Cooking Tim Miller, 2017-07-01 American Home Cooking provides an answer to the question of why in the face of all the modern technology we have for saving time Americans still spend time in their kitchens cooking Americans eat four to five meals per week in a restaurant and buy millions of dollars worth of convenience foods Cooking especially from scratch is clearly on its way out However if this is true why do we spend so much money on kitchen appliances both large and small Why are so many cooking shows and cookbooks published each year if so few people actually cook In American Home Cooking Timothy Miller

argues that there are historical reasons behind the reality of American cooking There are some factors that over the past two hundred years have kept us close to our kitchens while there are other factors that have worked to push us away from our kitchens At one end of the cooking and eating continuum is preparing meals from scratch all ingredients are raw and unprocessed and in extreme cases grown at the home On the other end of the spectrum is dining out at a restaurant where no cooking is done but the family is still fed All dining experiences exist along this continuum and Miller considers how American dining has moved along the continuum He looks at a number of different groups and trends that have affected the state of the American kitchen stretching back to the early 1800s These include food and appliance companies the restaurant industry the home economics movement of the early 20th century and reform movements such as the counterculture of the 1960s and the religious reform movements of the 1800s And yet the kitchen is still most often the center of the home and the place where most people expect to cook and eat even if they don't
