Bolivia and the Making of the Global Indigenous Movement Juanita Roca-Sánchez,2024-10-30

This book investigates how western anthropological trends development discourse and transnational activism came to create and define the global indigenous movement Using Bolivia as a case study the author demonstrates through a historical research how international ideas of what it means and does not mean to be indigenous have played out at the national level Tracing these trends from pre revolutionary Bolivia the Inter American

indigenismo in the 1940s up to Evo Morales downfall the book reflects on Bolivia s national level policy discourse and constitutional changes but also asks to what extent these principles have been transmitted to the country s grassroots organisations and movements such as Indianismo Katarismo CSUTCB and CIDOB Overall the book argues that indigeneity can only be adequately understood as a longue dur e anthropological political and legal construction crafted within broader geopolitical contexts Within this context the classical dichotomy between indigenous and whites should be challenged in favour of a more nuanced understanding of plural indigeneities This book will be of interest to researchers from across the fields of global studies political anthropology history of anthropology international development socio legal studies Latin American history and indigenous studies
