The Island that Disappeared Tom Feiling, 2018-03-20 The creation myth of the United States begins with the plucky English puritans of the Mayflower but what about the story of its sister ship the Seaflower Few people today know the story of the passengers aboard the Seaflower who in 1630 founded a rival puritan colony on an isolated Caribbean island called Providence They were convinced that England's empire would rise not in barren New England but rather in tropical Central America However Providence became a colony in constant crisis crops failed slaves revolted and then there were the pirates And as Tom Feiling discovers in this surprising history the same drama was played out by the men and women who re settled the island one hundred years later The Island That Disappeared presents Providence as a fascinating microcosm of colonialism even today At first glance it is an island of devout churchgoers but look a little closer and you see that it is still dependent on its smugglers At once intimate and global this story of puritans and pirates goes to the heart of the contradictory nature of the Caribbean and how the Western World took shape

Families of the Missing Simon Robins, 2013-05-29 Families of the Missing interrogates the current practice of transitional justice from the viewpoint of the families of those disappeared and missing as a result of conflict and political violence Studying the needs of families of the missing in two contexts Nepal and Timor Leste the practice of transitional justice is seen to be rooted in discourses that are alien to predominantly poor and rural victims of violence and that are driven by elites with agendas that diverge from those of the victims In contrast to the legalist orientation of the global transitional justice project victims do not see judicial process as a priority Rather they urgently seek an answer concerning the fate of the missing and to retrieve human remains As important are livelihood issues where families are struggling to cope with the loss of breadwinners and seek support to ensure economic security Although rights are the product of a discourse that claims to be global and universal needs are necessarily local and particular the product of culture and context And it is from this perspective that this volume seeks both to understand the limitations of transitional justice processes in addressing the priorities of victims and to provide the basis of an emancipatory victim centred approach to transitional justice
