

Language Families

Few regions of the world boast as diverse and dense a collection of language families as West Africa. It is home to the three major language families on the African continent: Niger-Congo, Afro-Asiatic and Nilo-Saharan.

Except for Arabic and Hausa, the major languages are from the Niger-Congo family: Yoruba, Igbo, Fulfulde/Pulaar, Akan, and Wolof. However, the remaining language groups are well-represented as the continental sub-region is home to native speakers of over 500 languages. West African languages have the largest concentration of first and second-language speakers on the continent, after Amharic and Swahili in East Africa.

Language	# of Native Speakers
Akan (AKA)	8,300,000
Fulah (FUL)	12,269,800
Hausa (HAU)	24,988,000
Igbo (IBO)	18,000,000
Manding (MAN)	4,537,000
Mooré (MOS)	5,061,700
Ngomba (NGO)	63,000
Yemba (YBS)	300,000
Yoruba (YOR)	19,380,800
Wolof (WOL)	3,976,500

Number of native speakers of select languages, ISO 639-3 codes in parentheses. Source: data: Ethnologue.com

Challenges for Language Resource Development

Human language technology (HLT) development relies on digital language resources, including: lexicons, grammars, monolingual and parallel corpora, morphological analyzers, taggers and segmenters.

West African languages present numerous challenges to the researcher, both technological and not, some language specific and some common to the region.

Among these challenges are:

- Complex phonology and morphology (Bantu)
- Verb serialization (Kwa)
- Complex pronoun systems (Yoruba)
- Diaspora forms in addition to multiple dialects (Yoruba)
- Absence of established writing systems (many)

Fieldwork in West African Languages

For languages with limited text resources or no writing tradition, speech data and corresponding transcripts provide fundamental information about the language.

In addition to the usual technologies (digital recorders and laptop computers), such field work requires customized transcription software and novel approaches to subject recruitment and elicitation.

Compounding these challenges are dynamic morphophonological processes, such as segment deletion, segment assimilation, vowel harmony, nasalization and word contraction. Also, resource developers must address the lack of standardized orthographies, fonts and encodings.

The interactions of these phenomena make West African languages challenging for human analysts as well as HLT systems.

The West African sub-region, an area stretching from Mauritania and Liberia inland to Chad and Cameroon
