The Laser in America, 1950-1970 Joan Lisa Bromberg, 1991 In this book Joan Lisa Bromberg brings a historian's broad perspective to bear on the formative years of laser research in the United States 3D Jens Schröter, 2014-01-30 There is a blind spot in recent accounts of the history theory and aesthetics of optical media namely the field of the three dimensional or trans plane image It has been widely used in the 20th century for very different practices military scientific and medical visualization precisely because it can provide more spatial information And now in the 21st century television and film are employing the method even more Appearing for the first time in English Jens Schroeter's comprehensive study of the aesthetics of the 3D image is a major scholarly addition to this evolving field Citing case studies from the history of both technology and the arts this wide ranging and authoritative book charts the development in the theory and practice of three dimensional images Discussing and analyzing the transformation of the socio cultural and technological milieu Schroeter has produced a work of scholarship that combines impressive historical scope with contemporary theoretical arguments

Practical Holography, 2003 **The Theory of Laser Materials Processing** John Dowden, 2009-01-06 The purpose of this book is to show how general principles afford insight into laser processes The principles may be from fundamental physical theory or from direct observation but understanding of the general characteristics of a process is essential
