**Networks of Music and Culture in the Late Sixteenth and Early Seventeenth Centuries** David J. Smith, Rachelle Taylor, 2016-04-29 Peter Philips c 1560 1628 was an English organist composer priest and spy He was embroiled in multifarious intersecting musical social religious and political networks linking him with some of the key international players in these spheres Despite the undeniable quality of his music Philips does not fit easily into an overarching progressive view of music history in which developments taking place in centres judged by historians to be of importance are given precedence over developments elsewhere which are dismissed as peripheral These principal loci of musical development are given prominence over secondary ones because of their perceived significance in terms of later music However a consideration of the networks in which Philips was involved suggests that he was anything but at the periphery of the musical cultural religious and political life of his day In this book Philips s life and music serve as a touchstone for a discussion of various kinds of network in the late sixteenth and early seventeenth centuries The study of networks enriches our appreciation and understanding of musicians and the context in which they worked The wider implication of this approach is a constructive challenge to orthodox historiographies of Western art music in the Early Modern Period

**The Praise of Musicke, 1586** Hyun-Ah Kim, 2017-11-20 This volume provides the first printed critical edition of The Praise of Musicke 1586 keeping the original text intact and accompanied by an analytical commentary Against the Puritan attacks on liturgical music The Praise of Musicke the first apologetic treatise on music in English epitomizes the Renaissance defence of music in civil and religious life While existing studies of The Praise of Musicke are limited to the question of authorship the present volume scrutinizes its musical discourse which recapitulates major issues in the ancient philosophy and theology of music considering the contemporary practice of sacred and secular music Through an interdisciplinary analysis of The Praise of Musicke combining historical musicology with philosophical theology this study situates the treatise and its author within the wider historical intellectual and religious context of musical polemics and apologetics of the English Reformation thereby appraising its significance in the history of musical theory and literature The book throws fresh light on this substantial but neglected treatise that presents with critical insights the most learned discussion of music from classical antiquity to the Renaissance and Reformation era In doing so it offers a new interpretation of the treatise which marks a milestone in the history of musical apologetics
