The Way of Tao Part II , *John Stuart Mill and the Religion of Humanity* Linda C. Raeder, 2002 John Stuart Mill and the Religion of Humanity introduces material that requires significant reevaluation of John Stuart Mill s contribution to the development of the liberal tradition John Stuart Mill and the Religion of Humanity examines the religious thought and aspirations of the philosopher and shows that contrary to the conventional view of Mill as the prototypical secular liberal religious preoccupations dominated his thought and structured his endeavors throughout his life For a proper appreciation of Mill s thought and legacy the depth of his animus toward traditional transcendent religion must be recognized along with the seriousness of his intent to found a nontheological religion to serve as its replacement Book Jacket **The Eclectic Magazine of Foreign Literature, Science, and Art** , 1884 **An Introduction to the Philosophy of Religion** John

in knowing the thought and practice of the twentieth century Indian thinker and yogi Sri Aurobindo      Reconfigurations of Philosophy of Religion Jim Kanaris,2018-03-01 This collection addresses as it exemplifies an identity crisis in contemporary philosophy of religion It represents a unique two way dialogue between philosophers of religion and scholars of religion and broaches issues pertaining to the philosophy of religion and the philosophical tradition on the one hand and religious studies theology and the modern academy on the other While each author manages the current challenges in philosophy of religion differently one can nonetheless discern a polyphony of interests surrounding a postcritical postsecular appreciation of religion In part 1 contributors ask how philosophy of religion can accommodate both the strengths and weaknesses of Western analytic and continental traditions incorporate developments in ideology critique gender studies and Asian philosophies and negotiate the perceived stalemate in philosophy of religion Part 2 addresses these questions in terms of a philosophy of religion that is postcolonial in intention and multidisciplinary in orientation and features scholarship from the fields of both religion and theology An underlying theme is the importance of ushering philosophy of religion into a postphenomenological era of religious studies and theology This is a neglected dimension in many laudable discussions about philosophy of religion that this volume hopes to emend      **Self and Other: Essays in Continental Philosophy of**

known that religion as well as philosophy depends upon language for the expression of its truths This seems a simple proposition but what are its consequences If language is the sole medium of development of the higher thoughts and feelings in its genesis may we not hope to discover the deepest truths of life and mind Before the complex symbols which we call words came into use and hence before the mind acquired the faculty of forming thoughts or extended comparisons activities

or motions were the only medium of expression between sentient beings Language is the development of these expressive actions and so highly complex has it become so far removed from its rude beginnings that it seems another order of creation a system of miraculous origin But when we remember that intelligence is a concomitant development with language that thought or spirit is but a building up of words into ideas and that these words are merely condensed memories common experiences which have become current from tongue to tongue is it not evident that there is no impenetrable mystery in speech and that its product mind is a synthesis of simple and familiar truths Again when we retrace sensibility or feeling from which language has been gradually evolved to its beginnings in organic life we find no absolute demarcations we find that all life whether mental or physical is interdependent
