The Labour Governments, 1945-51 Henry Pelling, 1984-05-03 This book by the author of the best seller Winston Churchill is a concise reassessment of the first postwar British Governments based upon original sources a task not previously attempted by any scholar While sympathetic to Labour s aims in the 1945 general election campaign which itself receives fresh treatment Henry Pelling exposes areas of difficulty and weakness in the Government s strategy and uncovers the doubts and hesitations of its leaders Much of the evidence comes from official papers recently released to the Public Record Office but the private papers of Attlee Morrison Bevin and Dalton among others have been drawn upon to add details to the story For the first time too there is a study of the importance of Marshall Aid as well as of the friction that is occasioned behind the scenes with the Truman Administration and the US Congress Highly readable this book makes a major contribution to recent history and to a better understanding of the present political and international situation *Attlee's*

The Labour Party, Nationalism and Internationalism, 1939-1951 R. M. Douglas, 2004 The Second World War was a watershed moment in foreign policy for the Labour Party in Britain Before the war British socialists had held that nationalism was becoming obsolete and that humanity was steadily evolving towards the ideal of a single world government The collapse of the League of Nations destroyed this optimistic vision compelling Labour to undertake a fundamental review of its entire approach to foreign affairs during a period of unprecedented global crisis This book traces the controversy that ensued as the British democratic left set about the task of defining the principles of a radically new international system for the postwar world The schemes proposed by Labour policymakers during these years encompassed a wide variety of political institutions

aiming at the restraint or supersession of the sovereign nation state What they shared in common however was a reconceptualization of British identity in which the hyper patriotism of the wartime period blended with the left s traditional internationalism This new muscular internationalism was to have a major impact upon the evolution of entities as diverse as the United Nations Organizations the British Commonwealth and the accelerating campaign in favor of European unity after Labour assumed the reins of government in 1945 Breaking with the traditional accounts that place Cold War tensions at the centre of the Attlee government s activities in the immediate postwar years R M Douglas s book provides an entirely new framework for reassessing British foreign policy and left wing concepts of national identity during the most turbulent moment of Britain s modern history This book will be essential reading for all students and researchers of British foreign policy the Labour Party and international relations

Attlee's Labour Governments, 1945-51 Robert D. Pearce, 1994

Labour Governments and Private Industry Helen Mercer, Neil Rollings, Jim Tomlinson, 1992 In 1945 a Labour government with socialist aspirations was elected Prior to this much of the Left s political energy had been directed towards nationalisation and the private sector had been seen as peripheral Equally the private sector was ill prepared to deal with a Labour government Despite the coolness between the two the war had left a legacy of a high level of interaction between private industry and the forces of government Labour Governments and Private Industry examines in detail the complex relationship between the Labour government and the private sector The first part of the book analyses the types of policy in operation and their implementation The second part takes certain sectors of British industry as case studies to consider the practical application of these policies Throughout the book the contributors focus their arguments around three main questions To what extent were the policies of this Labour government actually socialist What was the role of the Labour government as a modernising agency in the private sector What was the power of private industry to hinder the policies of the government Despite the centrality of the years 1945 51 for an understanding of Britain s long term industrial problems this is the first historical study of the relationship between privately owned industry and the government during the period Its relevance for contemporary politics can hardly be overestimated This reconsideration of a crucial period with the benefits of the modern perspective is timely and necessary

Secondly the circumstances mentioned above have to be taken into consideration by looking at the economic and social situation in Britain after the war
