Digging below the Surface asks why and enters territory not previously explored by environmentalists It describes the various ways to make a living on the earth hunting and gathering shifting agriculture nomadic herding settled agriculture and industrial technology as choices not eras choices coexisting with one another until today It rewrites economics It explores the relationship of warfare slavery religion and human sexuality to the environmental crisis And it is forced to conclude that these aspects of human culture are not only shaped but created by the technologies we use that the use of non human sources of energy interferes with human psychological development and that the unfulfilled urges within us explode in the violent technologies that are destroying our planet The solutions if it is not too late therefore lie in wise choice rather than wise use of our technologies     *Fish and Wildlife News* U.S. Fish and Wildlife Service,1989     **Fish and Wildlife News** ,1986
