The Land Of Moab Travels And Discoveries On The E:

Near Eastern Tribal Societies During the Nineteenth Century Eveline van der Steen, 2014-10-14 This volume provides an in depth study of tribal life in the Near East in the 19th century exploring how tribes shaped society economy and politics in the desert as well as in villages and towns Until the First World War Near Eastern society was tribally organized Particularly in the Levant and the Arabian peninsula where the Ottoman empire was weak large and powerful tribes such as Anaze Beni Sakhr and Shammar interacted and competed for control of the land the people and the economy The main sources for this study are travel accounts of 19th century adventurers and explorers Their travels on horseback on camel or on foot opened a fascinating window on a world with an ideology that was fundamentally different from their own often Victorian background One chapter is dedicated to oral traditions in the region from heroic epics to short poems which lets the tribes and tribe members themselves speak giving a voice to the tribal frame of mind Evidence of tribal organization as a driving force in society can be found in documents and sometimes in the archaeological record from the Bronze Age onwards While a straight comparison between ancient and subrecent tribal communities is fraught with difficulties and must be treated with caution a better understanding of 19th century tribal ethics and customs provides useful insights into the history and the power relations of a more distant past At the same time it may help us understand some of the underlying causes for the present conflicts afflicting the region

Circular ,1873 *The Publishers' Circular and General Record of British and Foreign Literature* ,1873 *Dolmens in the Levant* James A. Fraser,2018-01-17 When Western explorers first encountered dolmens in the Levant they thought they had

discovered the origins of a megalithic phenomenon that spread as far as the Atlantic coast Although European dolmens are now considered an unrelated tradition many researchers continue to approach dolmens in the Levant as part of a trans regional phenomenon that spanned the Taurus mountains to the Arabian peninsula By tightly defining the term dolmen itself this book brings these mysterious monuments into sharper focus Drawing on historical archaeological and geological sources it is shown that dolmens in the Levant mostly concentrate in the eastern escarpment of the Jordan Rift Valley and in the Galilean hills They cluster near proto urban settlements of the Early Bronze I period 3700 3000 BCE in particular geological zones suitable for the extraction of megalithic slabs Rather than approaching dolmens as a regional phenomenon this book considers dolmens as part of a local burial tradition whose tomb forms varied depending on geological constraints Dolmens in the Levant is essential for anyone interested in the rise of civilisations in the ancient Middle East and particularly those who have wondered at the origins of these enigmatic burial monuments that dominate the landscape **The American**
