Round, 2010-10-11 In 1663 the Puritan missionary John Eliot with the help of a Nipmuck convert whom the English called

James Printer produced the first Bible printed in North America. It was printed not in English but in Algonquian making it one of the first books printed in a Native language. In this ambitious and multidisciplinary work Phillip Round examines the relationship between Native Americans and printed books over a two hundred year period uncovering the individual communal regional and political contexts for Native peoples use of the printed word. From the northeastern woodlands to the Great Plains Round argues alphabetic literacy and printed books mattered greatly in the emergent transitional cultural formations of indigenous nations threatened by European imperialism. Removable Type showcases the varied ways that Native peoples produced and utilized printed texts over time approaching them as both opportunity and threat. Surveying this rich history Round addresses such issues as the role of white missionaries and Christian texts in the dissemination of print culture in Indian Country the establishment of national publishing houses by tribes the production and consumption of bilingual texts the importance of copyright in establishing Native intellectual sovereignty and the sometimes corrosive effects of reprinting thereon and the significance of illustrations.

*Indigenous Languages and the Promise of Archives* Adrianna Link, Abigail Shelton, Patrick Spero, 2021-05. *Indigenous Languages and the Promise of Archives* captures the energy and optimism that many feel about the future of community based scholarship which involves the collaboration of archives scholars and Native American communities. The American Philosophical Society is exploring new applications of materials in its library to partner on collaborative projects that assist the cultural and linguistic revitalization movements within Native communities. A paradigm shift is driving researchers to reckon with questionable practices used by scholars and libraries in the past to pursue documents relating to Native Americans practices that are often embedded in the content of the collections themselves. The Center for Native American and Indigenous Research at the American Philosophical Society brought together this volume of historical and contemporary case studies highlighting the importance of archival materials for the revitalization of Indigenous languages. Essays written by archivists historians anthropologists knowledge keepers and museum professionals cover topics critical to language revitalization work they tackle long standing debates about ownership access and control of Indigenous materials stored in repositories and they suggest strategies for how to decolonize collections in the service of community based priorities. Together these essays reveal the power of collaboration for breathing new life into historical documents.
