## **The Last Winter:**

*Last Winter's Snow* Hans M Hirschi, 2017-04-06 This is the story of Nilas and how he navigates life trying to reconcile being gay as well as being Sami. Set over several decades we follow Nilas and his Swedish husband Casper as they build a life amid the shallows of bigotry, discrimination and the onset of the AIDS crisis. *Last Winter's Snow* portrays recent LGBT history from a Swedish perspective from the days when being gay was considered a mental disorder to today's modern anti-discrimination legislation and the move toward equality. It's also the story of one couple and the ups and downs of everyday life in the face of changing rules and attitudes toward them and their relationship. Last not least it's a book that celebrates the rich history and culture of the Sami and their land, Sami as well as their ongoing struggle to achieve recognition and win back the right to self-determination over lands they've lived on for thousands of years. *Last Winter's Snow* is Hans M Hirschi's first novel set almost entirely in Sweden but it is the second time after *Fallen Angels* of Karnataka he takes his readers on a journey into the mountainous regions of Scandinavia in one of his acclaimed novels.

*Heavenly Numbers* Christopher Cullen, 2017 This book is a history of the development of mathematical astronomy in China from the late third century BCE to the early 3rd century CE, a period often referred to as early imperial China. It narrates the changes in ways of understanding the movements of the heavens and the heavenly bodies that took place during those four and a half centuries and tells the stories of the institutions and individuals involved in those changes. It gives clear explanations of technical practice in observation, instrumentation and calculation and the steady accumulation of data over many years but it centres on the activity of the individual human beings who observed the heavens, recorded what they saw and made calculations to analyse and eventually make predictions about the motions of the celestial bodies. It is these individuals, their observations, their calculations and the words they left to us that provide the narrative thread that runs through this work. Throughout the book the author gives clear translations of original material that allow the reader direct access to what the people in this book said about themselves and what they tried to do.

**the Early Modern World** Ovanes Akopyan, David Rosenthal, 2023-11-17 How did early modern societies think about disasters such as earthquakes or floods? How did they represent disaster and how did they intervene to mitigate its destructive effects? This collection showcases the breadth of new work on the period ca 1300-1750. Covering topics that range

from new thinking about risk and securitisation to the protection of dikes from shipworm and with a geography that extends from Europe to Spanish America the volume places early modern disaster studies squarely at the intersection of intellectual cultural and socio economic history This period witnessed fresh speculation on nature the diffusion of disaster narratives and imagery and unprecedented attempts to control the physical world The book will be essential to specialists and students of environmental history and disaster as well as general readers who seek to discover how pre industrial societies addressed some of the same foundational issues we grapple with today     Annual report of the Ohio State Board of Agriculture Ohio (State) Board of Agriculture,1847     **Report** United States.
