The Carpathians: Integrating Nature and Society Towards Sustainability Jacek Kozak, Katarzyna Ostapowicz, Andrzej Bytnerowicz, Bartłomiej Wyżga, 2013-04-15 The book includes a broad spectrum of perspectives from different scientific disciplines both the natural and social sciences as well as practical knowledge It gives a new insight into the Carpathian mountain region **Cultural Heritage of East Central Europe** Wojciech Roszkowski, 2015-01-02 The concept of culture is a relatively modern invention It stems from the Latin term cultura meaning cultivation Cicero was the first to use this word in a non agricultural context In his Tusculanae Disputationes he reflected on the cultivation of the soul cultura animi Later this term was rarely used in this sense but as of the 17th century more and more authors considered culture an intellectual and not an agricultural phenomenon Samuel Pufendorf 1632 1694 described culture as a vehicle overcoming natural barbarism He was followed by German philosophers of culture Johann Gottfried Herder 1744 1803 argued that human creativity was as important as human rationality and called attention to national cultures The works of German romantic philosophers were mainly focused on the specificity of the German culture a factor that was to unite divided German statehoods At the same time however Herder and his followers noticed other national cultures including first of all those of East and Central Europe It is therefore noteworthy that the early philosophical reflection on culture was closely connected with the specific traditions of East and Central Europeans *Legal and*

Approaches to the Archaeological Heritage Henry Cleere, 1984-08-16. This book undertakes a comparative study of the history and development of legislative and administrative systems in operation today for the protection of archaeological monuments. With the exception of Scandinavia and the United Kingdom, no country adopted a positive policy towards the protection and conservation of its archaeological and historical heritage until the twentieth century. Moreover, it was not until the middle of that century, under the threat of wholesale devastation from extensive schemes for social and economic development, that the accelerating disappearance of the sites and monuments of Antiquity became the object of intensive study and legislation. Since then, systems of cultural resource management have developed throughout the world. A range of countries from Europe, America, Asia and Africa, representing a diversity of political and ideological systems, capitalist, socialist and ex colonial, have been selected as being broadly representative of the variety of these systems. The case studies have been written by distinguished archaeologists and provide critical evaluations of the objectives and shortcomings of these systems.

Because the second part of the research on Károlyi heritage was performed during the pandemic

instead of field trips specialist opinions were invited resulting in this book The conclusions show how green spaces in itself are not only subject of study during the pandemic but also a factor to cope with it The main body is structured into a feature paper on the K rolyi heritage in Slovakia as well as interviews from Romania and abroad structured around the contemporary challenges in the heritage landscape and restoration of historical gardens The invited specialists answered the same 5 questions Three of them also visited other K rolyi gardens two of them on the purpose of intervention The book includes images and plans of gardens across Europe including Romania Italy Hungary Germany the Netherlands apart of Slovakia Also methodological approaches are included
