Izdebski, John Haldon, Piotr Filipkowski, 2022-07-14 This is an open access book Histories we tell never emerge in a vacuum and history as an academic discipline that studies the past is highly sensitive to the concerns of the present and the heated debates that can divide entire societies But does the study of the past also have something to teach us about the future Can history help us in coping with the planetary crisis we are now facing By analyzing historical societies as complex adaptive systems we contribute to contemporary thinking about societal environmental interactions in policy and planning and consider how environmental and climatic changes whether sudden high impact events or more subtle gradual changes impacted human responses in the past We ask how societal perceptions of such changes affect behavioral patterns and explanatory rationalities in premodernity and whether a better historical understanding of these relationships can inform our response to contemporary problems of similar nature and magnitude such as adapting to climate change
