analytical results should be confirmed by the numerically observed solution behavior **Advances in Information and Communication** Kohei Arai,2025-03-04 This book comprises the proceedings of the Future of Information and Communication Conference FICC 2025 held on 28 29 April 2025 in Berlin Germany The conference brought together leading researchers industry experts and academics from across the globe to discuss the latest advancements challenges and opportunities in the rapidly evolving field of information and communication technologies The conference received an impressive 401 submissions of which 138 high quality papers were selected after a rigorous peer review process These contributions span a diverse range of topics including artificial intelligence cybersecurity data science networking human computer interaction and more FICC 2025 provided an engaging platform for collaboration and knowledge exchange highlighting state of the art research and practical solutions to global challenges This proceedings book serves as a valuable resource for researchers practitioners and innovators seeking insights into the future of information and communication technologies School Directory Santa Barbara County (Calif.).
