Small Really Is Beautiful:

Democracy in Small States Jack Corbett, Wouter Veenendaal, 2018-09-19 Populism and the personalization of politics appears to be threatening the existence of democracy as we know it all over the world It is now more important than ever to understand the history of this form of regime why it has thrives and fails But existing studies are limited by their focus on a few large and predominately rich states This book takes the opposite approach it investigates how politics is practiced in the smallest states where hyper personalization has always been a ubiquitous feature of political life It optimistically finds that hyper personalized democracy can actually persist against all odds but also cautions that political practices in small states are often markedly different to larger states Oxford Studies in Democratization is a series for scholars and students of comparative politics and related disciplines Volumes concentrate on the comparative study of the democratization process that accompanied the decline and termination of the cold war The geographical focus of the series is primarily Latin America the Caribbean Southern and Eastern Europe and relevant experiences in Africa and Asia The series editor is Laurence Whitehead Senior Research Fellow Nuffield College University of Oxford *Are Small Firms Important? Their Role and Impact* Stephen Ackermann, 2012-12-06 Are Small Firms Important Their Role and Impact proposes and supports the claim that small firms make two indispensable contributions to the economy First they are an integral part of the renewal process that pervades market economies New and small firms play a crucial role in experimentation and innovation that leads to technological change productivity and economic growth Second small firms are the essential mechanism by which millions enter the economic and social mainstream of American society The public policy implications for sustained economic growth and social well being is the continued high level creation of new and small firms by all segments of society It should be the role of government policy to facilitate that process by eliminating entry barriers lowering transaction costs and minimizing regulation **Using Technology in Foreign Language Teaching** Rahma Al-Mahrooqi, Salah Troudi, 2014-10-17 Language learning is a complex and challenging endeavor For students to achieve the desired proficiency in English as a Foreign Language EFL their institutions need to invest time effort and huge resources in order to cater for different learning styles To be cost effective many language teaching institutions strive to provide intensive foreign language FL instruction to reduce the time period needed to learn the target language This explains the current interest in combining **The Individual and Utopia** Clint Jones, Cameron Ellis, 2016-03-09 Central to the idea of a perfect society is the idea that communities must be strong and bound together with shared ideologies However while this may be true rarely are the individuals that comprise a community given primacy of place as central to a strong communal theory This volume moves away from the dominant current macro level theorising on the subject of identity and its relationship to and with globalising trends focusing instead on the individual s relationship with utopia so as to offer new interpretive approaches for engaging with and examining utopian individuality Interdisciplinary in scope and bringing together work from around the world The

Individual and Utopia enquires after the nature of the utopian as citizen demonstrating the inherent value of making the individual central to utopian theorizing and highlighting the methodologies necessary for examining the utopian individual. The various approaches employed reveal what it is to be an individual yoked by the idea of citizenship and challenge the ways that we have traditionally been taught to think of the individual as citizen. As such it will appeal to scholars with interests in social theory, philosophy, literature, cultural studies, architecture and feminist thought whose work intersects with political thought, utopian theorizing or the study of humanity or human nature. *Beyond Ujamaa in Tanzania* Goran

Hyden, 2023-11-10 *Beyond Ujamaa in Tanzania* Underdevelopment and an Uncaptured Peasantry explores the challenges of development and underdevelopment in Africa with a focus on Tanzania's experience during its early socialist years. The book critiques the dominant ideologies of development, whether capitalist or socialist, as being rooted in Western industrial paradigms that often fail to address the realities of pre-capitalist African societies. It argues that the underdevelopment in Africa is not solely due to excessive penetration by global capitalism but also to capitalism's inability to dismantle the resilient pre-capitalist structures in many rural societies. The author highlights the role of the Tanzanian peasantry whose economic and social autonomy often resists the centralizing tendencies of modern development, presenting them not as mere appendages to the global economy but as key players with their own modes of production and unique societal structures. The book is grounded in over a decade of fieldwork and engagement with rural Tanzanian communities, enriched by the author's fluency in Swahili and deep involvement in local life. It argues for a more nuanced approach to studying African societies, one that goes beyond Western assumptions and models. By placing the peasant mode of production at the center of analysis, the study challenges conventional wisdom and suggests that the primary development challenge in Africa lies not with multinational corporations but with understanding and working within the dynamics of the smallholder peasant economy. The author also reflects on the limitations of conventional social science research and calls for greater involvement in the lived realities of the communities studied, emphasizing the need for research methods that are sensitive to local contexts and values. The book combines academic critique, field observations, and a focus on the epistemological biases of Western scholarship to present a compelling argument for rethinking development in Africa. Hambira, Emmanuel Mogende, 2023-11-03 The *Handbook on Tourism and Conservation* demonstrates the intrinsic nexus between tourism, the environment, and sustainable natural resources use. It applies Ostrom's social ecological systems (SESs) theory as the analytical framework for reaching a consensus on divergent viewpoints within the context of global environmental change and emerging governance.

issues **Focus on governance for more effective policy and technical support** Bojic, D., Clark, M., Urban, K., 2022-06-28 There are eight years left to reach the SDGs Agrifood systems transformation is urgently needed if we are to achieve sustainability resilience and food security and nutrition in a post COVID world This desired transformation can only be achieved by strengthening and capitalizing on the knowledge experience skills and capabilities for collective action of a broad range of public and private actors each of whom bring distinctive interests needs resources influence and capacities Governance is the name for this multidimensional capability for effective and inclusive collective action at all levels In many country contexts it is the governance bottlenecks that lead to a gap between policy expectations and their outcomes on the ground For example a given policy intervention can make a lot of economic sense but if it is perceived as threatening a powerful interest group or not sufficiently considering that group s interests it will most probably fail Understanding the governance both institutions and political economy behind existing agrifood systems can thus make or break the success of any policy or technical support work Bringing together insights from FAO s rich experience and knowledge and global literature this paper introduces an operational four phased framework for analysis and integration of governance analysis and action into formulation and implementation of interventions at country regional and global levels It also provides a review of recent trends in expert thinking about governance for sustainable development and highlights FAO s conceptual contributions to governance in the areas of FAO s mandate The increased use of governance analysis in FAO s work will stimulate iterative collective learning processes and honest evaluation of potential for change thus supplementing technical solutions with approaches based on a solid understanding of practical and political realities on the ground With its emphasis on continual learning and adaptation governance analysis will enable FAO to significantly improve the effectiveness of its policy and technical support to Members to achieve sustainable development that leaves no one behind *Year Book Australia 1994* Australian Bureau of Statistics, 1993 Small States and International Law British Institute of International and Comparative Law, 2025-08-28 International law can serve as both a sword and a shield for small States including in the realisation of their rights on the international plane While it can offer a mode of protection to small States and provide opportunities to engage with issues of global concern international law also presents challenges and difficulties for small States in some contexts The chapters in this edited volume explore small States many and diverse interactions with international law in numerous contexts and fora and across a range of thematic areas and issues including climate change disarmament technological development and human rights amongst many others *Key Topics in Conservation Biology 2* David W. Macdonald, Katherine J. Willis, 2013-02-06 Following the much acclaimed success of the first volume of Key Topics in Conservation Biology this entirely new second volume addresses an innovative array of key topics in contemporary conservation biology Written by an internationally renowned team of authors Key Topics in Conservation Biology 2 adds to the still topical foundations laid in the first volume published in 2007 by exploring a further 25 cutting edge issues in modern

biodiversity conservation including controversial subjects such as setting conservation priorities balancing the focus on species and ecosystems and financial mechanisms to value biodiversity and pay for its conservation Other chapters setting the framework for conservation address the sociology and philosophy of peoples relation with Nature and its impact on health and such challenging practical issues as wildlife trade and conflict between people and carnivores As a new development this second volume of Key Topics includes chapters on major ecosystems such as forests islands and both fresh and marine waters along with case studies of the conservation of major taxa plants butterflies birds and mammals A further selection of topics consider how to safeguard the future through monitoring reserve planning corridors and connectivity together with approaches to reintroduction and re wilding along with managing wildlife disease A final chapter by the editors synthesises thinking on the relationship between biodiversity conservation and human development Each topic is explored by a team of top international experts assembled to bring their own cross cutting knowledge to a penetrating synthesis of the issues from both theoretical and practical perspectives The interdisciplinary nature of biodiversity conservation is reflected throughout the book Each essay examines the fundamental principles of the topic the methodologies involved and crucially the human dimension In this way Key Topics in Conservation Biology 2 like its sister volume Key Topics in Conservation Biology embraces issues from cutting edge ecological science to policy environmental economics governance ethics and the practical issues of implementation Key Topics in Conservation Biology 2 will like its sister volume be a valuable resource in universities and colleges government departments and conservation agencies It is aimed particularly at senior undergraduate and graduate students in conservation biology and wildlife management and wider ecological and environmental subjects and those taking Masters degrees in any field relevant to conservation and the environment Conservation practitioners policy makers and the wider general public eager to understand more about important environmental issues will also find this book invaluable

Failure or Reform? Stewart Lockie, 2019-09-10 Market reform promises more environmental protection and more profitable agriculture at lower financial cost Too good to be true This book examines numerous empirical examples of policy in action to identify principles for the successful application of market based policy instruments Where some market instruments are used to fix market failures by putting a value on environmental protection others use market like mechanisms to allocate financial incentives for environmental work They are promoted as flexible efficient and politically neutral solutions to the competing demands of social economic and ecological sustainability But they also attract criticism for rolling back environmental regulation and privatizing public goods This book argues that while many market based instruments have merit decisions about responsibility cannot be left entirely to the market Whichever instruments we use decision making needs to be embedded in a logic of democratization Using case studies from around the world this book investigates how instruments like eco standards payments for ecosystem services pollution trading and community based natural resource management perform in practice and what can be learned about applying them more effectively While the

approach is primarily sociological it is deliberately written to bridge the gap between sociology economics environmental sciences and the concerns of environmental policy makers Intertextuality in the Tales of Rabbi Nahman of Bratslav

Marianne Schleicher,2007 This book the first scholarly work on all thirteen tales in Rabbi Nahman of Bratslav s Sippurey Ma asiyot draws upon the concept of intertextuality to explain how Nahman defines his theology of redemption and encourages an appropriation of his religious world view **Adaptive Capacity and Environmental Governance** Derek Armitage,Ryan Plummer,2014-07-08

Rapid environmental change calls for individuals and societies with an ability to transform our interactions with each other and the ecosystems upon which we depend Adaptive capacity the ability of a social ecological system or the components of that system to be robust to disturbances and capable of responding to changes is increasingly recognized as a critical attribute of multi level environmental governance This unique volume offers the first interdisciplinary and integrative perspective on an emerging area of applied scholarship with contributions from internationally recognized researchers and practitioners It demonstrates how adaptive capacity makes environmental governance possible in complex social ecological systems Cutting edge theoretical developments are explored and empirical case studies offered from a wide range of geographic settings and natural resource contexts such as water climate fisheries and forestry Of interest to researchers policymakers and resource managers seeking to navigate and understand social ecological change in diverse geographic settings and resource contexts *Enabling legal frameworks for sustainable land-use investments in Tanzania: Legal assessment report* Robert Kibugi,D. Andrew Wardell,Marie-Claire Cordonier Segger,Caroline Haywood,Renée

Gift,2015-10-08 The International Development Law Organization IDLO and the Center for International Forestry Research CIFOR assessed the legal frameworks that govern land use activities and investments in Tanzania The policy institutional and legal frameworks are well developed although implementation and enforcement remains weak due to ambiguities in the law and a general lack of supportive incentives This Legal Assessment report for Tanzania examines four key challenges to the attainment of sustainable land use investments These comprise Enforcement of environmental and social safeguards Tanzania has made progress in implementing the Environmental Management Act by ensuring greater compliance with the Environmental Impact Assessment regulations although exceptions exist in the construction sector and mining legislation that often enables the government to circumvent important land tenure safeguards Incentives for sustainable investments in the legal framework A lack of incentives exists despite the creation of the Tanzania Investment Centre the adoption of an Investment Guide in 2013 and the incorporation of sustainability considerations into laws and policies governing investments in the agriculture energy and forestry and mining sectors Land tenure security Tanzania s land law framework now includes formal recognition of customary title and the reservation of land under the category of village land exclusively for Tanzanians although improvements are still needed in terms of processes of consultation and compensation Public awareness and lack of access to information Awareness of natural resources and investment policies legislation and regulations is generally low
