Small Nations In Times Of Crisis And Confrontation:

Small Nations in Times of Crisis and Confrontation Yohanan Cohen,2012-02-01 The question is how should small states behave under pressure The analysis is of three cases Czechoslovakia in 1938 Poland from 1939 to 1945 and Finland in 1940 and 41 The author is scrupulous in not drawing too many general lessons from these cases but the imprudence of overreliance on great power protection and of ceding to justifications for surrender based on self determination are made clear

The Problems of Genocide A. Dirk Moses,2021-02-04 Genocide is not only a problem of mass death but also of how as a relatively new idea and law it organizes and distorts thinking about civilian destruction Taking the normative perspective of civilian immunity from military attack A Dirk Moses argues that the implicit hierarchy of international criminal law atop which sits genocide as the crime of crimes blinds us to other types of humanly caused civilian death like bombing cities and the collateral damage of missile and drone strikes Talk of genocide then can function ideologically to detract from systematic violence against civilians perpetrated by governments of all types The *Problems of Genocide* contends that this violence is the consequence of permanent security imperatives the striving of states and armed groups seeking to found states to make themselves invulnerable to threats

Europe's Coherence Gap in External Crisis and Conflict Management Bertelsmann Stiftung,2020-04-07 External interventions to mitigate crises or end conflicts have rarely succeeded The EU and its member

states in particular have repeatedly run up against their limits in the civil wars in Afghanistan the Congo Libya Syria the Sahel region and Yemen However the EU if not the entire international community have learned one lesson from their faltering peacebuilding efforts If they are to have any chance of making a meaningful and lasting difference they must develop and use comprehensive strategies that combine and coordinate the various tools available to diplomacy development cooperation and security The 29 reports presented in this book one for each EU member state as well as one on the EU as a whole examine how steep the learning curve has been and accordingly how successful these bodies have been at forming new linkages among the various actors involved in external crisis and conflict management as well as within and between their institutions and organisations While the EU clearly still has a long way to go before it can live up to its rhetoric and become a distinct and effective actor on the foreign policy stage small and incremental steps in reorganising institutional practise may help in narrowing the gap between words and deeds This volume provides examples of how the EU and its member states have found new organisational structures and procedures specifically at the headquarters level to better organise the necessary combination and coordination of the many tools available for crisis and conflict management These ways are then juxtaposed in a big picture chapter which also identifies best practices for successful WGA implementation

IDF Journal ,1988 **The Somalia Conflict Revisited** Israel Nyaburi Nyadera,Nazmul Islam,Billy Agwanda,2024-03-30 This book aims to examine how informality of spatial governance has influenced the evolution of the conflict in Somalia and the region It not only reopens the debate over how the irregular conflicts can transcend national boundaries but also presents the complexities of spatial governance on national and regional security The book examines how socio political and identity bonds play out in spatial governance sometimes resulting to informal control of vast national territories The book argues that such informally governed spaces increase the level of security threat vulnerability at the national and regional levels The book therefore adds to the existing literature which has not only to be dominated by discourses on the impact of identity on the conflict but also fall short of connecting the impact of informal spatial governance on security Examining how informality in governance in one country can impact on the security of an entire region is a key consideration in emerging peacebuilding strategies **Political Science Quarterly** Columbia University. conflicts around the world *Resounding Pasts* Drago Momcilovic, 2020-05-15 The field of memory studies has long been preoccupied with the manner in which events from the past are commemorated forgotten re fashioned or worked through on both the individual and collective level Yet in an age when various modes of artistic and cultural commemoration have begun to overlap with and respond to one another the dynamics of cultural remembering and forgetting become bound up in an increasingly elaborate network of representations that operate both within and outside temporal cultural and national borders As publicly circulating texts that straddle the line between cultural artifact and artistic object both musical and literary works both individually and often in conjunction with one another help shape cultural memories and individual experiences of those events Troping their cultural milieux through specific aesthetic and social forms genres and modes of dissemination music and literature become part of a growing global panoply of raw materials upon which we might begin to pose questions regarding the way we remember the consequences of sharing and passing on those memories and the aesthetic and cultural pressures attendant upon the circulation and interpretation of texts that re sound the past

Military Power, Conflict and Trade Michael P. Gerace, 2004-06-01 Wherever international commerce flows in world politics military power often flows with it sometimes as a protector of commerce sometimes as its promoters and sometimes as a tool of aggression against it How are military power and international trade related Do military power and commerce expand together or does military power decline as commerce and perhaps interdependence increases Does this relationship vary across countries and if so how Power Conflict and Trade is a study of the relationship between military power and international commerce among the Great Powers prior to World War I After building an argument for a direct relationship between military power and commerce one grounded in a mercantilist view of state power and exploring their numerous connections the book estimates models of the relationship among the Great Powers and explores a great deal of their commercial and military data all of which is situated in the context of their mutual rivalries Another question investigated is whether the peacetime conflicts and rivalries of the Great Powers affected their trade relations adversely There is strong support for the argument that military power and commerce move together in world politics though there is evidence for an inverse relationship as well *The Arab-Israeli Conflict* P.R. Kumaraswamy, 2023-04-24 This book provides a holistic view of the conflict between Israel and its Arab neighbours and studies the global implications of their fraught relations Focusing on the conflict from its beginning in the late 19th century the author provides a well rounded and balanced narrative by examining its religious ideological ethnic political national regional and international dimensions The volume covers a wide range of issues such as the conflicting historical legacy of the city of Jerusalem Jewish longing for a homeland the partition of Palestine various wars and conflicts since 1948 Palestinian resistance the Arab Boycott of Israel and the Abraham Accords It also tackles the contested national claims and the refugee question and looks at various peace making efforts including the role of external stakeholders such as the US UK Russia and India A comprehensive study of the Arab Israeli conflict the book
