that follow the shoreline Most of the lakes also don't have the same in lake structure as southern Impoundments Most natural lakes are less than 50 feet deep and most of the fish attracting structure will be in 20 feet or less One of the huge advantages to this is you can eliminate most of the lake from fishing before you even get there because the fish will not be in the deep flat bottom areas Ecology of Smallmouth Bass Micropterus Dolomieu Early Life History in Three North Temperate Lakes
