*Lesson Study as Pedagogic Transfer* Kanako N. Kusanagi,2022-11-01 This book examines education transfer specifically focusing on pedagogic transfer and analyzes what happens when lesson study is introduced into foreign contextual settings Lesson study a professional development approach that originated in Japan 150 years ago has been widely considered one of the best practices for collaborative professional development There is an underlying assumption behind education transfer that when best practice is transferred to another country it will generate a similar effect and improve schooling quality Since pedagogic practice is socially constructed the best practice in one setting may not be meaningful in another contextual setting This book makes a unique contribution to the field of comparative education by offering a sociological examination of why pedagogic transfer often fails to bring expected benefits It is comprised of three parts Part I Pedagogic Transfer and Lesson study provides contextualized analysis of lesson study in Japan and abroad and presents how the meaning of practice is always reinterpreted against the local educational context Part II presents a sociological analysis of Indonesian teachers practice based on ethnographic fieldwork It conceptually analyses the nature of the teacher community and their practice and is presented as teacher strategies The concept showed that teacher culture and practice are not fixed but constantly negotiated within the institutional setting Part III Sociological Understanding of Pedagogic Transfer builds on the analyses in Part I and II and provides a theoretical understanding of the issue of pedagogic transfer Professional responsibilities of teachers collegiality and teaching expertise in Japan and Indonesia are compared to understand how the meaning of lesson study was reconstructed in the Indonesian setting In conclusion recommendations for an alternative approach to professional development are offered
