Sonata for Prisms Carol Goss, 2001 **Tosca's Prism** Deborah Burton, Susan Vandiver Nicassio, Agostino Ziino, 2004

Distinguished musicologists historians theater professionals and luminaries of the operatic stage reflect on European history in 1800 1900 and 2000 through the prism of Puccini's Tosca **The Prism of the Self** S.G. Crowell, 2013-03-09 This volume contains sixteen essays written by his students and colleagues in honor of Maurice Natanson The essays explore some of the diverse themes Professor Natanson has pursued through forty years of teaching and philosophizing in the tradition of existential phenomenology Because it also includes a lengthy biographical and philosophical interview where one can find an absorbing account of Natanson's Lebens au in his own words there is no need to detail that polypragmatic career here Suffice to say that even passing acquaintance with the man and the work will reveal that Edmund Husserl's self description holds equally of his distinguished interpreter I seek not to instruct but only to lead to point out and describe what I see I claim no other right than that of speaking according to my best lights principally before myself but in the same manner also before others as one who has lived in all its seriousness the fate of a philosophical existence I For Natanson as the diversity of the contributions to this volume attest such seriousness involves something other than that narrow technical vision for which a topic is the more philosophical the less it has to do with anything else In Natanson's pages to say nothing of his teaching and conversation there are no men of straw but living breathing human beings with their philosophy's tentacles are ubiquitous **Prisms and Rainbows** Elinor S. Miller, Pierre Alechinsky, 2003-02 Some of the artworks pose difficulties in interpretation but regardless of amorphous subjects and confusing representations Butor's creativity finds poetry in them

The Prism and the Pendulum Robert Crease, 2007-12-18 Is science beautiful Yes argues acclaimed philosopher and historian of science Robert P Crease in this engaging exploration of history's most beautiful experiments The result is an engrossing journey through nearly 2 500 years of scientific innovation Along the way we encounter glimpses into the personalities and creative thinking of some of the field's most interesting figures We see the first measurement of the earth's circumference accomplished in the third century B C by Eratosthenes using sticks shadows and simple geometry We visit Foucault's mesmerizing pendulum a cannonball suspended from the dome of the Pantheon in Paris that allows us to see the rotation of the earth on its axis We meet Galileo the only scientist with two experiments in the top ten brilliantly drawing on his musical training to measure the speed of falling bodies And we travel to the quantum world in the most beautiful experiment of all We also learn why these ten experiments exert such a powerful hold on our imaginations From the ancient world to cutting edge physics these ten exhilarating moments reveal something fundamental about the world pulling us out of confusion and revealing nature's elegance The Prism and the Pendulum brings us face to face with the wonder of science
