Photography in Argentina Idurre Alonso, Judith Keller, 2017-09-15 From its independence in 1810 until the economic crisis of 2001 Argentina has been seen in the national and international collective imaginary as a modern country with a powerful economic system a massive European immigrant population an especially strong middle class and an almost nonexistent indigenous culture In some ways the early history of Argentina strongly resembles that of the United States with its march to the prairies and frontier ideology the image of the cowboy as a national symbol equivalent to the Argentine gaucho the importance of the immigrant population and the advanced and liberal ideas of the founding fathers But did Argentine history truly follow a linear path toward modernization How did photography help shape or deconstruct notions associated with Argentina Photography in Argentina examines the complexities of this country's history stressing the heterogeneity of its realities and especially the power of constructed photographic images that is the practice of altering reality for artistic expression an important vein in Argentine photography Influential specialists from Argentina have contributed essays on various topics such as the shaping of national myths the adaptation of gesture as related to the disappeared during the dictatorship period the role of contemporary photography in the context of recent sociopolitical events and the reinterpreting of traditional notions of documentary photography in Argentina and the rest of Latin America

Photographers Peter E. Palmquist, 2000 **Visual Typologies from the Early Modern to the Contemporary** Tara Zanardi, Lynda Klich, 2018-07-04 Visual Typologies from the Early Modern to the Contemporary investigates the pictorial representation of types from the sixteenth to the twenty first century Originating in longstanding visual traditions including street crier prints and costume albums these images share certain conventions as they seek to convey knowledge about

different peoples The genre of the type became widespread in the early modern period developing into a global language of identity The chapters explore diverse pictorial representations of types customs and dress in numerous media including paintings prints postcards photographs and garments Together they reveal that the activation of typological strategies including seriality repetition appropriation and subversion has produced a universal and dynamic pictorial language Typological images highlight the tensions between the local and the international the specific and the communal and similarity and difference inherent in the construction of identity The first full length study to treat these images as a broader genre Visual Typologies gives voice to a marginalized form of representation Together the chapters debunk the classification of such images as unmediated and authentic representations offering fresh methodological frameworks to consider their meanings locally and globally and establishing common ground about the operations of objects that sought to shape embody or challenge individual and collective identities *Encyclopedia of Twentieth-century Photography* Lynne Warren,2006
